The Kyrenia Ship Final Excavation Report, Volume I Susan Womer Katzev, Helena Wylde Swiny, 2022-12-01 The Kyrenia Ship a Greek merchantman built around 315 BC which sank off the north coast of Cyprus was excavated between 1968 and 1972 under the direction of Michael L Katzev of the University of Pennsylvania and Oberlin College The importance of this ship lies in the exceptionally well preserved hull that provided new insights into ancient shipbuilding as well as the cargo it carried The hold was stacked with transport amphoras of various types made on Rhodes with a few examples from Samos Kos Knidos and Cyprus supplemented by a consignment of millstones iron billets and almonds The cabin pottery from Rhodes also suggests this was the vessel's home port a conclusion supported by most of the scientific ceramic analyses Its trade route included Rhodes Cyprus and the Levant with perhaps Egypt as a final destination This volume provides a detailed history of the excavation followed by definitive studies of the amphora cargo and the pottery associated with shipboard life Some of the

amphora stamps suggest that the ship sank between 294 and 291 BC dates corroborated by the cabin wares The repetition of four drinking cups kantharoi oil containers gutti wine measures olpai as well as bowls and saucers suggests that the ship was sailed by a crew of four Seven bronze coins were recovered five minted in the name of Alexander the Great and one well known type of Ptolemy I produced only on Cyprus Other Animals in Twenty-First Century Fiction Catherine

Parry,2017-07-19 This book is about ordinary animals and how they are imagined in twenty first century fiction Examining contemporary animal representations and the fraught and potent distinctions humans fashion between themselves and all other animals it asks how a range of novels make re make or un make traditional conceptions of the creatures we love admire eat vilify and abuse Other Animals detailed readings of horses an animalised human a donkey ants chickens and chimpanzees develop new critical practices in Literary Animal Studies They explore the connections between fictional animal representation narrative form ethics and the lives and warm bodies of the real world creatures that precede and exceed our imagination Human animal relationships are conditioned by our imaginative shapings of other animals and by our sense of distinction from them and Other Animals opens out how fictional animal forms and tropes respond to participate in or challenge the ways animals lives are lived out in consequence of human imaginings of them Octopus Richard

Schweid,2013-10-15 Our relationship to the octopus dates back to prehistory when the eight armed animal was depicted on vases and found in stone carvings from ancient Greece Now we appreciate them for their abilities as escape artists with sophisticated camouflage systems and ink jets as well as their roles in tasty dishes from many cuisines Octopuses are also among the most intelligent invertebrates in the world with mental capacity comparable to that of a dog In this heavily illustrated book Richard Schweid details this animal s remarkable natural history and its multifaceted relationship with humans Schweid describes the octopus s intelligence defense mechanisms and short lifespan He shows how some people have considered octopuses as nothing more than a meal and examines their role in the modern global fish and seafood industry Other cultures he reveals see them as erotic totems or symbols of the darkest evils and he discusses the difficulties people face when trying to keep them as pets they are able to use their problem solving skills mobility and boneless body to escape seemingly secure tanks A fascinating glimpse into the extraordinary world of these popular creatures Octopus will immerse readers in its amazing undersea world
