conducts this process on a regular basis to ensure that the examinations and subsequent training and continuing professional education requirements encompass the topic areas relevant to the roles and responsibilities of today's practicing information security professionals. Refreshed technical content has been added to the official ISC 2 CISSP CBK to reflect the most current topics in the information security industry today. Some topics have been expanded, e.g., asset security, security assessment, and testing, while other topics have been realigned under different domains. The result is an exam that most accurately reflects the technical and managerial competence required from an experienced information security professional to effectively design, engineer, implement, and manage an organization's information security program within an ever-changing security landscape. The domain names have been updated as follows:

CISSP Domains Effective April 15, 2015

- Security and Risk Management
- Security Risk Compliance
- Law, Regulations, Business Continuity
- Asset Security
- Protecting Security of Assets
- Security Engineering
- Engineering and Management of Security
- Communications and Network Security

Some candidates may be wondering how these updates affect training materials for the CISSP credential. As part of the organization's comprehensive education strategy and certifying body best practices, ISC 2 training materials do not teach directly to its credential examinations. Rather, ISC 2 Education is focused on teaching the core competencies relevant to the roles and responsibilities of today's practicing information security professional. It is designed to refresh and enhance the knowledge of experienced industry professionals.
