Making it tangible. Learning outcomes in science education Sascha Bernholt, Knut Neumann, Peter Nentwig, 2012 One of the central features in current educational reforms is a focus on learning outcomes Many countries have established or revised standards to describe what teachers are supposed to teach and students are expected to learn More recently the emphasis has shifted to considerations of how standards can be operationalized in order to make the outcomes of educational efforts more tangible This book is the result of a symposium held in Kiel that was arranged by two science education groups one at the IPN Leibniz Institute for Science and Mathematics Education at the University of Kiel in Germany and the other at the University of York UK The seminar brought together renowned experts from 12 countries with different notions of the nature and quality of learning outcomes The aim was to clarify central conceptions and approaches for a better understanding among the international science education community The book is divided into five parts In Part A the organizers set the scene describing the rationale for arranging the symposium Part B provides a broad overview about different approaches challenges and pitfalls on the road to the clarification of meaningful and fruitful learning outcomes The set of papers in Part C provides deep insights into different although comparable approaches which aim to frame to assess and to promote learning and learning outcomes in science education Smaller projects are presented as well as broad coordinated national programs The papers in Part D outline the individual historical development from different national perspectives reflecting the deficits and problems that led to current reforms Finally a summary of the organizers analyses the conclusions from different vantage points

Cybercrime and Cloud Forensics: Applications for Investigation Processes Ruan, Keyun, 2012-12-31 While cloud computing continues to transform developments in information technology services these advancements have contributed to a rise in cyber attacks producing an urgent need to extend the applications of investigation processes Cybercrime and Cloud Forensics Applications for Investigation Processes presents a collection of research and case studies of applications for investigation processes in cloud computing environments This reference source brings together the perspectives of cloud customers security architects and law

enforcement agencies in the developing area of cloud forensics **Constructing History 11-19** Hilary Cooper, Arthur Chapman, 2009-07-09 This book describes and exemplifies strategies for teaching history across the 11-19 age range in rigorous and enjoyable ways. It illustrates active learning approaches embedded in pupil-led enquiries through detailed case studies which involve students in planning and carrying out historical enquiries, creating accounts and presenting them to audiences in ways that develop increasingly sophisticated historical thinking. The case studies took place in a number of different localities and show how practising teachers worked with pupils during each year from Y6 to Y13 to initiate, plan and implement enquiries and to present their findings in a variety of ways. Each case study is a practical example which teachers can use as a model and modify for their own contexts, showing how independent learning linked to group collaboration and peer assessment can enhance learning. Social constructivist theories of learning applied to historical thinking underpin the book with particular emphasis on links between personalised and collaborative learning and e-learning.
