BOOK JACKET **Overcoming Cynicism**, Megan Mustain, 2011-01-13 Engagements with the World Ron Leifer MD

MA, 2013-05-16 After fifty years of futile research on mind and behavior trying to find their causes in the brain without success psychiatrists and psychologists are turning their attention to the emotions also looking for their causes in the brain also without success The problem is that there is no generally accepted theory or paradigm for understanding the emotions William James suggested that such a paradigm must meet two criteria 1 it must explain each individual emotion i.e. anxiety anger depression etc and 2 it must relate all the emotions to each other This book presents such a paradigm It is based on the accepted biological principle that all organisms from the lowest to the highest function in two biological motives which I call bipolar reactivity All organisms seek pleasure and or that which sustains and promotes life and all organisms seek to avoid pain and or that which threatens or disables life Interestingly this biological principle corresponds to a basic principle of Buddhist psychology that the pain we cause to ourselves and to each other is caused by the Three Poisons desire aversion and ego Desire and aversion link humans to the great chain of being and ego distinguishes humans from all other beings and recognizes our unique capacity for symbolic reactivity I have used this paradigm for fifty years in my practice of psychotherapy and have found it very useful for understanding my patients mental and emotional pain and helping them to understand and heal themselves **Der Topos der Information in den Lebenswissenschaften** Daniel Frank, 2018-12-05

In der Mitte des zwanzigsten Jahrhunderts hielt der Informationsbegriff insbesondere durch die Molekularisierung der Genetik und die entstehende Kybernetik Einzug in die Biologie und avancierte zu einem der zentralen Begriffe der Lebenswissenschaften Dass es sich dabei jedoch nicht um einen theoretischen Term handelt sondern um einen schillernden Begriff der innerhalb unterschiedlicher lebenswissenschaftlicher Paradigmen ganz verschiedenes bedeutet lässt sich besonders deutlich am Beispiel der Biosemiotik und der Synthetischen Biologie aufzeigen In beiden Paradigmen sind mit dem Informationsbegriff und dessen semantischem Feld auch diverse Erklärungsansprüche verbunden die im vorliegenden Band einer wissenschaftsphilosophischen Kritik unterzogen werden Great Thoughts from Master Minds, 1891 **Fantastic**
