Balick, Paul Alan Cox, 2020-08-19 Is it possible that plants have shaped the very trajectory of human cultures Using riveting stories of fieldwork in remote villages two of the world's leading ethnobotanists argue that our past

and our future are deeply intertwined with plants Creating massive sea craft from plants indigenous shipwrights spurred the navigation of the world s oceans Today indigenous agricultural innovations continue to feed clothe and heal the world s population One out of four prescription drugs for example were discovered from plants used by traditional healers Objects as common as baskets for winnowing or wooden boxes to store feathers were ornamented with traditional designs demonstrating the human ability to understand our environment and to perceive the cosmos Throughout the world the human body has been used as the ultimate canvas for plant based adornment as well as indelible design using tattoo inks Plants also garnered religious significance both as offerings to the gods and as a doorway into the other world Indigenous claims that plants themselves are sacred is leading to a startling reformulation of conservation The authors argue that conservation goals can best be achieved by learning from rather than opposing indigenous peoples and their beliefs **KEY FEATURES** An engrossing narrative that invites the reader to personally engage with the relationship between plants people and culture Full color illustrations throughout including many original photographs captured by the authors during fieldwork New to this edition Plants That Harm a chapter that examines the dangers of poisonous plants and the promise that their study holds for novel treatments for some of our most serious diseases including Alzheimer s and substance addiction Additional readings at the end of each chapter to encourage further exploration Boxed features on selected topics that offer further insight Provocative questions to facilitate group discussion Designed for the college classroom as well as for lay readers this update of Plants People and Culture entices the reader with firsthand stories of fieldwork spectacular illustrations and a deep respect for both indigenous peoples and the earth s natural heritage **Plants, People and Practices** Jay Sanderson, 2017-05-18 Article 14 Protection Independent of Measures Regulating Production Certification and Marketing People, Plants and Protected Areas John Tuxill, 2013-12-16 Conservation of plant resources is often focused on seed banks and botanical gardens However the two authors of this volume present a comprehensive conservation strategy that complements this ex situ approach with practical guidance on in situ management and conservation of plant resources The book aims to facilitate better management of protected areas and to illustrate new approaches to conservation of plants within their landscapes It draws on concepts from forestry the agricultural sciences anthropology ethnology and ethnobotany and should be useful to practitioners academics and policy makers People, Plants, and Protected Areas John D. Tuxill, Gary Paul Nabhan, 2001 An invaluable practical guide to the management and conservation of plant resources in their natural habitats **How Plants Work** Stephen Blackmore, 2018-11-01 Today s plants are descended from simple algae that first emerged more than 500 million years ago and now there are around 400 000 species The huge diversity of forms that these plants take is staggering From towering redwoods to diminutive mosses from plants that developed stinging hairs and poisons to those that require fire to germinate or ocean currents to distribute their seeds But how have we arrived at this mind blowing variety in the plant kingdom How Plants Work seeks to answer this intriguing question drawing from a

wide range of examples from the everyday leaf to the most bizarre flowers **Simple and Fun Science F** Dennis

8 The study of science is important because it helps us understand how the world works That understanding is a reward in
itself But with that understanding we can find ways to improve our food comfort learning health safety transportation
communication and a whole lot more One way we learn science is by reading about discoveries made by scientists Another
way is by learning how scientists do their work and then through experiments and activities make discoveries on our own The
Simple and Fun Science Simplified series offers students both paths to understanding science Perhaps some day you too will
make an important discovery that will add to our understanding of how the world works Answers are provided at the back of
the book
