Kristi must clear her first client of the woman's murder. Unfortunately, her client, a poor ESL teacher, seems to be hiding something, and there are few other suspects. The Wholehearted Wife Erin Smalley, Greg Smalley, Gary Smalley, 2014-06-20. Although it takes two to have a great marriage, an important truth for any marriage partner to realize is that he or she can really change no one other than him or herself. Nevertheless, changes in just one person can have an amazing impact on a marriage relationship. Instead of focusing on "How do I have a better marriage," this book embraces that truth and helps women ponder the question "How can I be the best wife I can be." It provides every woman with skills, information, and encouragement to make a positive difference to this and future generations by wholeheartedly investing in her marriage and her relationship with her husband today. *The Wholehearted Wife* is written by Erin and Greg Smalley along with Gary Smalley, the creator and presenter of *Keys to a Loving Relationship*, one of the best-selling video series of all time. Recognizing that most, if not all, married women have either experienced a time when her marriage felt lifeless or sat with another female friend or family member who was experiencing that situation, this book is also a wonderful resource for those times. **Regulating Capital** David Andrew

Singer, 2007-07-12. Singer provides both a theory of the effects of domestic pressures on international regulation and a detailed analysis of regulators' attempts at international rulemaking in banking, securities, and insurance. **The SAGE**

World Lloyd Gruber, 2000-03-20. The last few decades have witnessed an extraordinary transfer of policy-making prerogatives from individual nation-states to supranational institutions. If you think this is cause for celebration, you are not alone. Within the academic community and not only among students of international cooperation, the notion that political institutions are mutually beneficial, that they would never come into existence, much less grow in size and assertiveness, were they not Pareto improving, is today's conventional wisdom. But is it true? In this richly detailed and strikingly original study, Lloyd Gruber suggests that this emphasis on cooperation's positive-sum consequences may be leading scholars of international relations down the wrong theoretical path. The fact that membership in a cooperative arrangement is voluntary, Gruber argues, does not mean that it works to everyone's advantage. To the contrary, some cooperators may incur substantial losses relative to the original non-cooperative status quo. So what then keeps these participants from withdrawing? Gruber's answer, in a word, is power: specifically, the go-it-alone power exercised by the regime's beneficiaries, many of whom would continue to benefit even if their partners, the losers, were to opt out. To lend support to this thesis, Gruber takes a fresh look at the political origins and structures of European Monetary Unification and NAFTA. But the theoretical arguments elaborated

in Ruling the World extend well beyond money and trade touching upon issues of long standing interest to students of security cooperation environmental politics nation building even political philosophy Bold and compelling this book will appeal to anyone interested in understanding how power politics really operates and why for better or worse it is fueling much of the supranational activity we see today

Constructing the International Economy Rawi Abdelal, Mark Blyth, Craig Parsons, 2015-10-27 Focusing empirically on how political and economic forces are always mediated and interpreted by agents both in individual countries and in the international sphere Constructing the International Economy sets out what such constructions and what various forms of constructivism mean both as ways of understanding the world and as sets of varying methods for achieving that understanding It rejects the assumption that material interests either linearly or simply determine economic outcomes and demands that analysts consider as a plausible hypothesis that economies might vary substantially for nonmaterial reasons that affect both institutions and agents interests Constructing the International Economy portrays the diversity of models and approaches that exist among constructivists writing on the international political economy The authors outline and relate several different arguments for why scholars might attend to social construction inviting the widest possible array of scholars to engage with such approaches They examine points of terminological or theoretical confusion that create unnecessary barriers to engagement between constructivists and nonconstructivist work and among different types of constructivism This book provides a tool kit that both constructivists and their critics can use to debate how much and when social construction matters in this deeply important realm Contributors Rawi Abdelal Harvard Business School Jacqueline Best University of Ottawa Mark Blyth Brown University Mlada Bukovansky Smith College Jeffrey M Chwieroth London School of Economics Francesco Duina Bates College Charlotte Epstein University of Sydney Yoshiko M Herrera University of Wisconsin Madison Paul Langley Northumbria University Craig Parsons University of Oregon Catherine Weaver University of Texas at Austin Wesley W Widmaier Saint Joseph s University Cornelia Woll CERI Sciences Po Paris
