Love in Interpretation Bryant K. Owens, 2019-02-28 Dr Bryant K Owens presents the argument of the value of the Christian tradition of caritas or love from the philosophy and the subsequent hermeneutic of Saint Augustine of Hippo 354 430 within contemporary philosophical scholarship Dr Owens's study of Augustine's investigations into biblical interpretation will reveal that he sought the beauty of understanding as evidenced through caritas The shift in the Western philosophical tradition during the Enlightenment period resulted in a solid break from authority based hermeneutics to the autonomy of the mind The result was a greater emphasis on the literal meaning of a text as gleaned from the subjective mind

of the reader and through grammatical and historical criticism over the spiritual meaning of the text or application of the greater meaning to Christian living Dr Owens proposes that the benefits of Augustine's caritas as the a priori spirit of the biblical text and the proper application of that spirit in contemporary scholarship should be the epistemological focus of hermeneutics rather than the emphasis on method prevalent from Spinoza to Dilthey The concluding value from Augustine's hermeneutic is that caritas is a product of understanding while at the same time is the method or means by which caritas is produced Therefore Augustine's hermeneutic argues that the sense or spirit of Scripture is caritas and is the truth to which all Christian philosophy must cohere

Philosophical Foundations of Neurolaw Martin Roth, 2017-11-30 As neuroscience continues to reveal the biological basis of human thought and behavior what impact will this have on legal theory and practice The emerging field of neurolaw seeks to address this question but doing so adequately requires confronting difficult philosophical issues surrounding the nature of mind free will rationality and responsibility In *The Philosophical Foundations of Neurolaw* Martin Roth claims that the central philosophical issue facing neurolaw is whether we can reconcile the conception of ourselves as free rational and responsible agents with the conception of ourselves as complex bio chemical machines Roth argues that we can reconcile these conceptions To show this Roth develops and defends an account of free will that identifies free will with the capacity to respond to rational demands and he argues that this capacity is at the foundation of our thinking about responsibility Roth also shows how the mind sciences can explain this capacity thus revealing that a purely physical system can have the kind of free will that is relevant to responsible agency Along the way Roth critiques a number of arguments that purport to show that the kind of reconciliation provided is not possible Roth concludes that though we should rethink our legal system in important ways both in light of his account of free will and what neuroscience is poised to reveal neuroscience does not threaten the law's core commitment to responsible agency
