in Philosophy Lindsay Falvey,2020-01-01 Agriculture and philosophy have been parts of a whole across history and remain so Philosophy informs wellbeing and contentment amidst the vagaries of existence the primary concern of which has always been security of food Science once known as natural philosophy is a major means of philosophical advance today Agricultural science is presented as comprising all of these components The philosophical quest to be at ease in nature extends from pre historical times into our unknown future and employs diverse vehicles to convey insights across generations via myths legends religion academic study and ritual practices Expressing esoteric concepts has employed agricultural metaphor across the historical era as it has been our most common interaction with nature Continuing as our most widespread human interaction within nature agriculture s role in creating civilization and later its writing eventually led to an urban separation from nature including food production Unifying the philosophy agriculture and agricultural science across cultures and traditions from pre agricultural times through the European Enlightenment to today this work builds on neglected ancient insights Perhaps the most profound of these insights is that our thoughts and actions may be seen as an integral part of nature Rather than being independent agents with free will our fears and guilt may be seen as active forces in the dynamics of nature itself which includes our procurement of food This conception offers a wider interaction than can be comprehended from current popular approaches
