Photofascism Vanessa Rocco, 2020-11-26 Photography and fascism in interwar Europe developed into a highly toxic and combustible formula Particularly in concert with aggressive display techniques the European fascists were utterly convinced of their ability to use the medium of photography to manufacture consent among their publics Unfortunately as we know in hindsight they succeeded Other dictatorial regimes in the 1930s harnessed this powerful combination of photography and exhibitions for their own odious purposes But this book for the first time focuses on the particularly consequential dialectic between Germany and Italy in the early to mid 1930s and within each of those countries vis vis display culture The 1930s provides a potent case study for every generation and it is as urgent as ever in our global political environment to deeply understand the central role of visual imagery in what transpired Photofascism demonstrates precisely how dictatorial regimes use photographic mass media methodically and in combination with display to persuade the public with often times highly destructive even catastrophic results

Kingstone,2023-01-06 This book shows how in nineteenth century Britain confronted with the newly industrialized and urbanized modern world writers artists journalists and impresarios tried to gain an overview of contemporary history They drew on two successive but competing conceptual models of overview the panorama and the compilation Both models claimed to offer a holistic picture of the present moment but took very different approaches This book shows that panoramas 360 views previously associated with the Romantic period and compilations big data projects previously associated with the Victorian fin de si cle are intertwined relevant across the entire century and often remediated making them crucial lenses through which to view a broad range of genre and forms It brings together interdisciplinary research materials belonging to different period silos to create new understandings of how nineteenth century audiences dealt with information overload It argues for a new politics of distance one that recognizes the value of immersing oneself in a situation event or phenomenon but which also does not chastise us for trying to see the big picture This book is essential reading for students and scholars of nineteenth century literature history visual culture and information studies [Visualizing Dunhuang](#) Dora C.
