Resources in Education ,2001-10 **List of the Agricultural Periodicals of the United States and Canada Published During the Century July 1810 to July 1910** Emma Beatrice Hawks,1941 This list of agricultural periodicals of the United States and Canada does not represent a complete list Science Education in Canada Christine D. Tippet, Todd M. Milford,2019-07-01 This book offers a meso level description of demographics science education and science teacher education Representing all 13 Canadian jurisdictions the book provides local insights that serve as the basis for exploring the Canadian system as a whole and function as a common starting point from which to identify causal relationships that may be associated with Canada s successes The book highlights commonalities consistencies and distinctions across the provinces and territories in a thematic analysis of the 13 jurisdiction specific chapters Although the analysis indicates a network of policy and practice issues warranting further consideration the diverse nature of Canadian science education makes simple identification of causal relationships elusive Canada has a reputation for strong science achievement However there is currently limited literature on science education in Canada at the general level or in specific areas such as Canadian science curriculum or science teacher education This book fills that gap by presenting a thorough description of science education at the provincial territorial level as well as a more holistic description of pressing issues for Canadian science education

Physics and the Rise of Scientific Research in Canada Yves Gingras,1991-03-01 The teaching of engineering and a change in liberal arts curricula both stimulated by industrial growth encouraged the creation of specialized courses in the sciences By the 1890s Gingras argues trained researchers had begun to appear in Canadian universities The technological demands of the First World War and the founding in 1916 of the National Research Council of Canada NRC accelerated the growth of scientific research The Transactions of the Royal Society of Canada could no longer publish everything submitted to it because of the disproportionately large number of research papers from the fields of science In response the NRC created the Canadian Journal of Research a journal specifically dedicated to the publication of scientific research By 1930 a stable national system of scientific research was in place in Canada Following the dramatic increase in the national importance of their disciplines scientists faced the problem of social identity Gingras demonstrates that in the case of physics this took the form of a conflict between those who promoted a professional orientation necessary to compete successfully with engineers in the labour market and those mainly in the universities who were concerned with problems of the discipline such as publication internal management and awards *Physics and the Rise of Scientific Research in Canada* is the first book to provide a general analysis of the origins of scientific research in Canadian universities Gingras proposes a sociological model of the formation of scientific disciplines distinguishing the profession from the discipline two notions often confused by historians and sociologists of science **Energy Research Abstracts** ,1990 **Nuclear Science Abstracts** ,1975-04
