Philosophy and Science in Phenomenological Perspective Kah Kyung Cho, 2012-12-06 The articles included in this volume originate from contributions to the International Conference on Philosophy and Science in Phenomenological Perspective held in Buffalo in March 1982. The occasion had been to honor the late Professor Marvin Farber, a long time distinguished member of the Department of Philosophy, State University of New York at Buffalo and the Founding Editor of the journal *Philosophy and Phenomenological Research*. Many of the papers were subsequently rewritten, expanded or otherwise edited to be published in the series *Phaenomenologica*. The articles by Professor Frings and Professor Rotenstreich had not been presented at the conference although they were originally invited papers. We regret that not all papers submitted to the conference including comments could be accommodated in this volume. Nonetheless, our sincere gratitude is due to all participants who have made the conference a memorable and worthy event. The Department of Philosophy, State University of New York at Buffalo as the sponsor of the conference wishes to acknowledge the grants from the Conferences in the Disciplines Program, Conversations in the Disciplines Program and the International Studies of the State University of New York at Buffalo as well as for a grant from the National Endowment for the Humanities. The International Phenomenological Society with Professor Roderick Chisholm succeeding Marvin Farber as its president co-sponsored the conference.

his epistemology **Intentionalitätstheorie beim frühen Brentano** A. Chrudzimski, 2013-06-29 The book is an analytic exposition of Brentano's early theory of intentionality. In spite of the immense influence of this theory it is the first separate monograph on this topic. The book is based in great part on the unpublished manuscripts where one can find substantially better articulated formulations than those expressed in the already published standard works. Our analysis concentrates mainly on the ontological and epistemological problems of Brentano's immanent object. We highlight an interesting ambiguity of this concept and try to outline the inner logic of its evolution. It turns out that Brentano's early philosophy of intentionality should be conceived not as a single well defined theory but rather as a bundle of kindred but not always fully consistent and sometimes even competing ideas. Primary audience for the work are philosophers interested in Brentano's philosophy, theory of intentionality and its epistemology and ontology, phenomenologists and cognitive scientists. Das Buch bietet eine analytische Darstellung von Brentanos früherer Theorie der Intentionalität. Trotz der großen historischen Bedeutung dieser Theorie bildet es die erste Monographie zu diesem Thema. Das Buch basiert zum größten Teil auf den unveröffentlichten Manuskripten, in denen man die Formulierungen findet, die viel besser artikuliert sind als jene, die in den publizierten Standardwerken Brentanos zu finden sind. Unsere Analyse konzentriert sich in erster Linie auf die ontologischen und epistemischen Probleme des Brentanoschen immanenten Objekts. Wir besprechen eine interessante Mehrdeutigkeit dieses Begriffs und skizzieren die innere Logik seiner Entwicklung. Es stellt sich heraus, dass die frühe Philosophie der Intentionalität Brentanos nicht als eine einheitliche, eindeutig bestimmte Theorie, sondern eher als ein Bündel von verwandten, jedoch nicht immer völlig kohärenten und manchmal sogar konkurrierenden Ideen interpretiert werden soll. Das Buch wendet sich in erster Linie an die Philosophen, die sich für die Philosophie Brentanos, für die österreichische Philosophie, für die Theorie der Intentionalität und ihre Epistemologie und Ontologie interessieren. Es wird ferner auch für die Phänomenologen und die Forscher im Bereich der Cognitive Science interessant sein.

Origins and Varieties of Logicism Francesca Boccuni, Andrea Sereni, 2021-11-29 This book offers a plurality of perspectives on the historical origins of logicism and on contemporary developments of logicist insights in philosophy of mathematics. It uniquely provides up to date research and novel interpretations on a variety of intertwined themes and historical figures related to different versions of logicism. The essays written by prominent scholars are divided into three thematic sections. Part I focuses on major authors like Frege, Dedekind and Russell, providing a historical and theoretical exploration of such figures in the philosophical and mathematical milieu in which logicist views were first expounded. Part II sheds new light on the interconnections between these founding figures and a number of influential other traditions represented by authors like Hilbert, Husserl and Peano, as well as on the reconsideration of logicism by Carnap and the logical empiricists. Finally, Part III assesses the legacy of such authors and of logicist themes for contemporary philosophy of mathematics, offering new perspectives on highly debated topics: neo-logicism and its extension to accounts of ordinal numbers and set theory, the comparison between neo-Fregean and neo-Dedekindian

varieties of logicism and the relation between logicist foundational issues and empirical research on numerical cognition which define the prospects of logicism in the years to come This book offers a comprehensive account of the development of logicism and its contemporary relevance for the logico philosophical foundations of mathematics It will be of interest to graduate students and researchers working in philosophy of mathematics philosophy of logic and the history of analytic philosophy The New Yearbook for Phenomenology and Phenomenological Philosophy Burt C.
