Qu bec Montr al John O Brian University of British Columbia James Opp Carleton University Joan M Schwartz Queen s University Sarah Stacy Library and Archives Canada Jeffrey Thomas Ottawa and Carol Williams Trent University University of Lethbridge Handbook of Intermediality Gabriele Rippl,2015-07-24 This handbook offers students and researchers compact orientation in their study of intermedial phenomena in Anglophone literary texts and cultures by introducing them to current academic debates theoretical concepts and methodologies By combining theory with text analysis and contextual anchoring it introduces students and scholars alike to a vast field of research which encompasses concepts such as intermediality multi and plurimediality intermedial reference transmediality ekphrasis as well as related concepts such as visual culture remediation adaptation and multimodality which are all discussed in connection with literary examples Hence each of the 30 contributions spans both a theoretical approach and concrete analysis of literary texts from different centuries and different Anglophone cultures **Family and Artistic Relations in Polish Women's Autobiographical Literature** Aleksandra Grzemska,2024-06-03 Family and Artistic Relations in Polish Women s Autobiographical Literature examines women s autobiographical works published in Poland after the year 2000 in a broader cultural context This volume focuses on the writers representation of their relationships with their mothers many of them traumatized survivors of historical cataclysms many of them professional artists many of them struggling to reconcile their creative work with their role as wife and mother Grzemska sheds light not only on the literary strategies used by the memoirists but she also helps us understand women s struggles for an independent voice for new models of commemoration for healing This book will interest readers in literary and cultural studies as well as anyone who wishes to better understand Poland s cultural transformations in the post Communist era The Holocaust and Representations of Jews K. Hannah Holtschneider,2014-03-21 This book examines how prominent national exhibitions in Europe represent the Jewish minority and its cultural and religious self understandings historically and today in particular in the context of the Holocaust Italians in Wales and their Cultural Representations, 1920s-2010s Bruna Chezzi,2015-11-25 Italian immigrants began to settle in Wales at the turn of the 19th century opening hundreds of coffee shops particularly in the South Wales Valleys Despite this such immigrants remain a largely unexplored case study in the history of Italian immigration to the UK This book uses a variety of unexplored sources and engages with the broader academic debate on migration identity and the trans generational transmission of memory to describe the emergence of Welsh Italian narratives and the formation of a distinctive yet complex Welsh Italian identity It follows a chronological journey moving from the interwar period a time in which Italians in Wales were generally regarded as fully established and integrated through to the Second World War a time when Italian identity became problematic and resulted in nearly seventy years of silencing up until the first decade of the 21st century where a mixture of commemorative events and cultural initiatives prompted the emergence of Welsh Italian narratives The book begins by studying photographic representations of Italians in Wales during the interwar period using photographs available in local history books private

collections and history books The analysis of the photographic material draws from the work of scholars such as Sontag Noble Hirsh and Bate on photo textual analysis to show how photographs can reveal understudied yet important aspects of Italian migrant identity and of the relationship with the host community in the period that preceded the Second World War The book then examines how the events of the Second World War destabilised the images of family sociability and integration suggested by these photographs and how such events aggravated tensions between host and migrant cultures It continues by investigating recent Welsh Italian texts where in revisiting the past and the experience of their ancestors the authors bring different circumstances and personal factors into play determining the degree to which they reconcile their dual identity It concludes with a comparison between these narratives of belonging and the representation of the Italian migrant experience in Anglo Welsh literature

Poetics of the Iconotext Professor Liliane Louvel, 2013-05-28 Poetics of the Iconotext makes available for the first time in English the theories of the respected French text image specialist Professor Liliane Louvel A consolidation of the most significant theoretical materials of Louvel's two acclaimed books *L'Oeil du Texte* *Texte et image dans la littérature anglophone* and *Texte Image Images lire textes voir* this newly conceived work introduces English readers to the most current thinking in French text image theory and visual studies Focusing on the full spectrum of text image relations from medieval illuminated manuscripts to digital books Louvel begins by introducing key terms and situating her work in the context of significant debates in text image studies Part II introduces Louvel's typology of pictorial saturation through which she establishes a continuum along which to measure the effect of the most figurative to the most literal images upon writerly and readerly textual spaces Part III adopts a phenomenological approach towards the reading viewing experience as expressed in conceptual categories that include the trace focal range synesthesia and rhythm and speed The result is a provocative interplay of the categorical and the subjective that invites readers to think at once more precisely and more inventively about texts images and the intersections between the two

The Future of Text and Image Ofra Amihay, Lauren Walsh, 2012-01-17 The question of the relation between the visual and the textual in literature is at the heart of an increasing number of scholarly projects and in turn the investigation of evolving visual verbal dynamics is becoming an independent discipline This volume explores these profound literary shifts through the work of twelve talented and in some cases emerging scholars who study text and image relations in diverse forms and contexts The inter medial conjunctures investigated in this book play with and against the traditional roles of the visual and the verbal The Future of Text and Image presents explorations of the incorporation of visual elements into works of literature of visual writing modes and of the textuality and literariness of images It focuses on the special potential literature offers for the combination of these two functions Alongside examinations of major forms and genres such as memoirs novels and poetry this volume expands the discussion of text and image relations into more marginal forms for instance collage books the PostSecret collections of anonymous postcards and digital poetry In other words while exploring the destiny of text and image as an independent

discipline this volume simultaneously looks at the very literal future of text and image forms in an ever changing technological reality The essays in this book will help to define the emergent practices and politics of this growing field of study and at the same time reflect the tremendous significance of the visual in today s image culture **Life and Narrative**
