course social isolation and loneliness may be episodic or chronic depending upon an individual's circumstances and perceptions. A substantial body of evidence demonstrates that social isolation presents a major risk for premature mortality comparable to other risk factors such as high blood pressure, smoking, or obesity. As older adults are particularly high volume and high frequency users of the health care system, there is an opportunity for health care professionals to identify, prevent, and mitigate the adverse health impacts of social isolation and loneliness in older adults. *Social Isolation and Loneliness in Older Adults* summarizes the evidence base and explores how social isolation and loneliness affect health and quality of life in adults aged 50 and older, particularly among low-income, underserved, and vulnerable populations. This report makes recommendations specifically for clinical settings of health care to identify those who suffer the resultant negative health impacts of social isolation and loneliness and target interventions to improve their social conditions. *Social Isolation and Loneliness in Older Adults* considers clinical tools and methodologies, better education and training for the health care workforce, and dissemination and implementation that will be important for translating research into practice, especially as the evidence base for effective interventions continues to flourish.

Living with Robots Richard Pak, Ewart J. de Visser, Ericka Rovira, 2019-11-30. *Living with Robots: Emerging Issues on the Psychological and Social Implications of Robotics* focuses on the issues that come to bear when humans interact and collaborate with robots. The book dives deeply into critical factors that impact how individuals interact with robots at home, work, and play. It includes topics ranging from robot anthropomorphic design, degree of autonomy, trust, individual differences, and machine learning. While other books focus on engineering capabilities or the highly conceptual philosophical issues of human-robot interaction, this resource tackles the human elements at play in these interactions, which are essential if humans and robots are to coexist and collaborate effectively. Authored by key psychology and robotics researchers, the book limits its focus to specifically those robots who are intended to interact with people, including technology such as drones, self-driving cars, and humanoid robots. Forward-looking, the book examines robots not as the novelty they used to be, but rather the practical idea of robots participating in our everyday lives. Explores how individual differences in cognitive abilities and personality influence human-robot interaction. Examines the human response to robot autonomy. Includes tools and methods for the measurement of social emotion with robots. Delves into a broad range of domains: military, caregiving, toys, surgery, and more. Anticipates the issues we will be encountering with robots in the next ten years. Foreword by Maggie Jackson, author of *Distracted*.

Bridging the Family Care Gap Joseph E. Gaugler, 2021-01-09. *Bridging the Family Care Gap* explores expected future shortages of family caregivers of older persons and identifies potential solutions. The book examines the sustainability and availability of care management models and whether they can be effectively scaled up to meet community needs. It identifies newly emerging policy initiatives at local, state, and federal levels. The book addresses the state of family caregiving science, dissemination, and implementation of promising programs, and supports technological innovations and other strategies to offset the family care

gap This edited volume also explores lay healthcare workers as guides interpreters and advocates in healthcare systems that provide continuity of contact for family caregivers Details threats to family caregiving sociodemographic chronic disease and socioeconomic challenges Presents solutions to the caregiving gap in a systematic synthesized manner Addresses the intersection of family caregiving and technology Discusses chronic disease management to offset and reduce the need for family caregiving Describes models of caregiver support in work settings Reimagines the delivery of long term services and supports with novel initiatives Physical Change and Aging: a Guide for the Helping Professions Sue V.
