The National Children's Study Research Plan National Research Council, Institute of Medicine, Board on Population Health and Public Health Practice, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on National Statistics, Panel to Review the National Children's Study Research Plan, 2008-07-16 The National Children's Study NCS is planned to be the largest long term study of environmental and genetic effects on children's health ever conducted in the United States It proposes to examine the effects of environmental influences on the health and

development of approximately 100 000 children across the United States following them from before birth until age 21 By archiving all of the data collected the NCS is intended to provide a valuable resource for analyses conducted many years into the future This book evaluates the research plan for the NCS by assessing the scientific rigor of the study and the extent to which it is being carried out with methods measures and collection of data and specimens to maximize the scientific yield of the study The book concludes that if the NCS is conducted as proposed the database derived from the study should be valuable for investigating hypotheses described in the research plan as well as additional hypotheses that will evolve Nevertheless there are important weaknesses and shortcomings in the research plan that diminish the study s expected value below what it might be Science Education and Curriculum in South Africa Oscar Koopman,2016-11-01 This book explores the impact of the socio historical political and economic environment in South Africa both during and after Apartheid During this time the South African education system demonstrated an interest in a specific type of knowledge which Koopman refers to as a science of government This science of government leaves the learners with a blurred understanding of science that is disconnected from external nature and human nature and is presented as a series of abstract concepts and definitions The book also investigates the dialectical tensions between the science curriculum and the role of the teacher as an active implementer of the curriculum The book draws on the work of various phenomenological scholars namely Edmund Husserl Martin Heidegger Merleau Ponty and Max van Manen to discuss these tensions **Anatomy & Physiology with Brief Atlas of the Human Body and Quick Guide to the Language of Science and Medicine - E-Book** Kevin T.
