Cook, 2021-01-11 This book refutes the 21st century notion that advancing technology is an unambiguous social good and examines the effects of this uncritical acceptance and dependence The author argues that technology has become the new religion for the digital age and that elevating technology to nearly the status of a deity allows for the denial of problems created by reliance upon machines From the release of toxins into the environment to the unsustainable energy demands of the modern era technological dependence is driving humanity near the brink of extinction Despite these problems and existential issues such as artificial intelligence and the proliferation of nuclear weapons many people have an unwavering belief in the ability of technology particularly any device labeled smart to create a perfect future while denying the history of unmet promises and unintended consequences of technological innovation The author explores the psychological underpinnings of these beliefs from both a clinical and a cognitive perspective The social and economic forces that maintain our reliance on or addiction to technology are critiqued as are the ethical and security issues associated with the control of advanced technology **The Resilience Dividend** Judith Rodin, 2014-11-11 Building resilience the ability to bounce back more quickly and effectively is an urgent social and economic issue Our interconnected world is susceptible to sudden and dramatic shocks and stresses a cyber attack a new strain of virus a structural failure a violent storm a civil disturbance an economic blow Through an astonishing range of stories Judith Rodin shows how people organizations businesses communities and cities have developed resilience in the face of otherwise catastrophic challenges Medellin Colombia was once the drug and murder capital of South America Now it s host to international conferences and an emerging vacation destination Tulsa Oklahoma cracked the code of rapid urban development in a floodplain Airbnb Toyota Ikea Coca Cola and other companies have realized the value of reducing vulnerabilities and potential threats to customers employees and their bottom line In the Mau Forest of Kenya bottom up solutions are critical for dealing with climate change environmental degradation and displacement of locals Following Superstorm Sandy the Rockaway Surf Club in New York played a vital role in distributing emergency supplies As we grow more adept at managing disruption and more skilled at

resilience building Rodin reveals how we are able to create and take advantage of new economic and social opportunities that offer us the capacity to recover after catastrophes and grow strong in times of relative calm
