The Management of Non-Hodgkin's Lymphomas in Europe Silvio Monfardini, 2012-12-06 The European School of Oncology came into existence to respond to a need for information education and training in the field of the diagnosis and treatment of cancer There are two main reasons why such an initiative was considered necessary Firstly the teaching of oncology requires a rigorously multidisciplinary approach which is difficult for the Universities to put into practice since their system is mainly disciplinary orientated Secondly the rate of technological development that impinges on the diagnosis of cancer has been so rapid that it is not an easy task for medical faculties to adapt their curricula flexibly With its residential

courses for organ pathologies and its seminars on new techniques or on the principal therapeutic controversies it is the ambition of the European School of Oncology to fill a cultural and scientific gap and thereby create a bridge between the University and Industry and between these two and daily medical practice One of the more recent initiatives of the ESO is the Intercity Meetings The concept of Inter city Meetings was first put forward with the idea of creating total coverage throughout Europe of certain tumours at the forefront of research and in some cases controversy

Non-Hodgkin's Lymphomas Ian Magrath,1990 The treatments for this group of malignant tumors have been primarily empirically derived with almost no theory developed These 27 papers begin to redress the balance by approaching the subject from a biological perspective rather than from a purely clinical and therapeutic one A large proportion of the book is devoted to the nature of the diseases themselves and their pathogenesis representing a foundation on which future diagnostic and treatment approaches can be built For oncologists and researchers Annotation copyrighted by Book News Inc Portland OR

Lennert,2012-12-06 The 1st Edition of Histopathology of Non Hodgkin s Lymphomas written in col laboration with Professor H STEIN and published in 1981 was received well and is now out of print In the meantime there has been an explosion of data that not only have made the definitions of various entities more precise but above all have confirmed the main entities originally delineated in the Kiel classification The development of monoclonal antibodies and molecular cytogenetics has also made it possible to identify T cell lymphomas more accurately For example many of the malignant lymphomas that were previously considered to be unclassifiable can now be included in a classification scheme that places the T cell lymphomas alongside of the list of B cell lymphomas In 1988 the European Lymphoma Club published an updated Kiel classification STANSFELD et al 1988 based on this new knowledge It includes a number of previously undefined types of T cell lymphoma Studies done in Japan T SUCH et al and China L Y Tu have contributed to the understanding of these lymphoma types
