**North African Politics** Yahia H. Zoubir, Gregory White, 2015-09-16 In the aftermath of the turmoil that shook North Africa in late 2010 and early 2011 commentators and analysts have sought explanations to the factors that triggered the uprisings and to understand why a region seemingly characterized by relative stability for decades would suddenly erupt in convulsions Had an underlying dynamism in the region overwhelmed what were ostensibly stable authoritarian regimes What were the connections to events and dynamics beyond the region such as countries in the Middle East international commodity markets and environmental factors amongst others Why had allies abetted authoritarianism for so long and what were the implications for such alliances *North African Politics* Change and continuity brings together experts to explore these questions providing in depth analyses of important developments in the region which build upon and complement the 2008 companion volume *North Africa Politics Region and the Limits of Transformation* This 21 chapter volume is a key contribution that responds to the need in the Anglo American sphere for sustained critical studies on North Africa and examines political economic security social and military aspects of the region Focused studies on individual countries allow detailed discussion of regional factors The book also examines extrinsic trans regional dynamics such as North Africa s influential interdependencies with the Levant and the Gulf Europe Sahelian and sub Saharan Africa and North America Its innovative approach provides new perspectives on North Africa extending its research scope to include Egypt and exploring China s evolving role in the region Providing an important contribution in the assessment of the ever shifting political and social tectonics within and beyond North Africa *North African Politics* is an essential resource for students scholars and policy makers in Middle Eastern and North African Studies and beyond

**Politics and Power in the Maghreb** Michael Willis, 2014-06 The overthrow of the regime of President Ben Ali in Tunisia on 14 January 2011 took the world by surprise The popular revolt in this small Arab country and the effect it had on the wider Arab world prompted questions as to why there had been so little awareness of it up until that point It also revealed a more general lack of knowledge about the surrounding western part of the Arab world or the Maghreb which had long attracted a tiny fraction of the outside interest shown in the eastern Arab world of Egypt the Levant and the Gulf This book examines the politics of the three states of the central Maghreb Algeria Tunisia and Morocco since their achievement of independence from European colonial rule in the 1950s and 1960s It explains the political dynamics of the region by looking at the roles played by the military political parties and Islamist movements and addresses factors such as Berber identity and economics as well as how the states of the region interact with each other and with the wider world Provided by publisher

*Elites and Arab Politics* Ian Kelly, 2020-06-11 This work explains elite behaviour in authoritarian systems and proposes why elites withdraw their support for the

incumbent when faced with popular uprisings Building upon foundations drawn from institutional authoritarianism and synthesised with local context from the substantial scholarship on the Middle East and North Africa the book argues that the elite supporting autocrats come from three distinct cadres the military the single party and the personalist Each of these cadres possesses its own distinct institutional interests and preferences towards regime change Drawing on these interests the study constructs a theoretical framework that is assessed through testing it against three variables Utilising an analytic narrative the research finds that the withdrawal of elite support is the consequence of long term processes that see distinct cadres marginalised First increased incumbent preference for personalist elements destabilises regimes as the military and single party cadres reconsider their positions Second neoliberal economic policies implemented via structural adjustment accelerated this personalisation as the state s withdrawal from the economy This in turn affected the ability of the military and single party elites to access patronage Finally the degree of military involvement in the formal political sphere contributes to shaping the nature of the system that replaced the incumbent regime under examination Building upon a wide range of literature the book argues that interest realisation determines whether or not elite actors support regime change in authoritarian systems The volume will be of interest to scholars researching politics social sciences and the Middle East

The Land beyond the Border Johannes Becke, 2021-05-01 Based on three case studies from the Middle East The Land beyond the Border advances an innovative theoretical framework for the study of state expansions and state contractions Johannes Becke argues that state expansion can be theorized according to four basic ideal types a form of patronage patronization the imposition of a satellite regime satellization the establishment of territorial exclaves exclavization or a full fledged takeover incorporation Becke discusses how both irredentist ideologies and political realities have shaped the dynamics of state expansion and state contraction in the recent history of each state By studying Israel comparatively with other Middle Eastern regimes this book forms part of an emerging research agenda seeking to bring the research fields of Israel Studies and Middle East Studies closer together Instead of treating Israel s rule over the occupied territories as an isolated case Becke offers students the chance to understand Israel s settlement project within the broader framework of postcolonial state formation

Willis,2022-10-11

When mass protests erupted in Algeria in 2019 on a scale unseen anywhere in the region since the Arab Spring the outside world was taken by surprise Algeria had been largely unaffected by the turmoil that engulfed its neighbours in 2011 and it was widely assumed that the population was too traumatised and cowed by the country s bloody civil war to take to the streets demanding change Michael J Willis offers an explanation of this unexpected development known as the HirakMovement examining the political and social changes that have occurred in Algeria since the dark decade of the 1990s He examines how the bitter civil conflict was brought to an end and how a fresh political order was established following the 1999 election of a dynamic new leader Abdelaziz Bouteflika Initially underwritten by revenue from Algeria s substantial hydrocarbons resources this new order came to be undermined by falling oil prices an ailing president and a population determined to have its voice heard by an increasingly corrupt out of touch and opaque national leadership Exactly twenty years passed before Bouteflika s presidency was brought to an end by the Hirak protests this book is an authoritative account of them **The Will of Change** Eva-Maria Maggi,2015-10-13 In this book Eva Maria Maggi argues that the European Union EU had an impact on institutional reform processes in North Africa in cases where major domestic actors agreed She analyzes how political actors in Morocco used EU neighborhood policies to shape economic and environmental policy between 1995 and 2008 Maggi argues that it was not the design of the EU s

neighborhood policies but rather the will of change of domestic actors in Morocco that determined the pace direction of reform and the extent to which the EU continues to play a role in them While Moroccan politics were indeed europeanized Maggi highlights the role of domestic actors who so effectively managed to put forth their own policy priorities and essentially morocconized the ENP
