Large-Scale Studies in Mathematics Education James A. Middleton,Jinfa Cai,Stephen Hwang,2015-05-05 In recent years funding agencies like the Institute of Educational Sciences and the National Science Foundation have increasingly emphasized large scale studies with experimental and quasi experimental designs looking for objective truths Educational researchers have recently begun to use large scale studies to understand what really works from developing interventions to validation studies of the intervention and then to efficacy studies and the final scale up for large implementation of an intervention Moreover modeling student learning developmentally taking into account cohort factors issues of socioeconomics local political context and the presence or absence of interventions requires the use of large data sets wherein these variables can be sampled adequately and inferences made Inroads in quantitative methods have been made in the psychometric and sociometric literatures but these methods are not yet common knowledge in the mathematics education community In fact currently there is no volume devoted to discussion of issues related to large scale studies and to report findings from them This volume is unique as it directly discusses methodological issue in large scale studies and reports empirical data from large scale studies

Gender and Diversity in a Problem and Project Based Learning

Environment Xiangyun Du, 2011 Problem and Project Based Learning PBL has been well used as an educational philosophy and methodology in the construction of student centered and contextualized learning environment PBL is also regarded as an effective method in producing engineering graduates who can not only meet the needs of professional competences but also are prepared for new challenges in the globalized and technological context However can PBL be a solution to the challenge of a general lack of university students studying engineering and technology in many countries The book reports an ethnographical study on the learning experiences of engineering students in the PBL environment in Denmark This book also attempts to question the issue of diversity in engineering education via the exploration of whether or in which ways the PBL environment is friendly to diverse groups of learners such as women
