Coalitions in the Climate Change Negotiations Carola Klöck, Paula Castro, Florian Weiler, Lau Øfjord

Blaxekjær, 2020-11-22 This edited volume provides both a broad overview of cooperation patterns in the UNFCCC climate change negotiations and an in depth analysis of specific coalitions and their relations Over the course of three parts this book maps out and takes stock of patterns of cooperation in the climate change negotiations since their inception in 1995 In Part I the authors focus on the evolution of coalitions over time examining why these emerged and how they function Part II drills deeper into a set of coalitions particularly new political groups that have emerged in the last rounds of negotiations around the Copenhagen Accord and the Paris Agreement Finally Part III explores common themes and open questions in coalition research and provides a comprehensive overview of coalitions in the climate change negotiations By taking a broad approach to the study of coalitions in the climate change negotiations this volume is an essential reference source for researchers students and negotiators with an interest in the dynamics of climate negotiations

Brazil and Climate Change Viola

Eduardo, Matías Franchini, 2017-10-23 Climate change is increasingly a part of the human experience As the problem worsens the cooperative dilemma that the issue carries has become evident climate change is a complex problem that systematically gets insufficient answers from the international system This book offers an assessment of Brazil's role in the global political economy of climate change The authors Eduardo Viola and Matías Franchini expertly review and answer the most common and widely cited questions on whether and in which way Brazil is aggravating or mitigating the climate crisis including Is it the benign cooperative environmental power that the Brazilian government claims it is Why was it possible to dramatically reduce deforestation in the Amazon 2005 2010 and more recently was there a partial reversion The book provides an accessible and much needed introduction to all those studying the challenges of the international system in the Anthropocene Through a thorough analysis of Brazil in perspective vis à vis other emerging countries this book provides an engaging introduction and up to date assessment of the climate reality of Brazil and a framework to analyze the climate performance of major economies both on emission trajectory and policy profile the climate commitment approach Brazil and Climate Change is essential reading for all students of Environmental Studies Latin American Studies International Relations and Comparative Politics

Ecologically Unequal Exchange R. Scott Frey, Paul K. Gellert, Harry F. Dahms, 2018-07-04

At a time of societal urgency surrounding ecological crises from depleted fisheries to mineral extraction and potential pathways towards environmental and ecological justice this book re-examines ecologically unequal exchange EUE from a historical and comparative perspective The theory of ecologically unequal exchange posits that core or northern consumption and capital accumulation is based on peripheral or southern environmental degradation and extraction In other words structures of social and environmental inequality between the Global North and Global South are founded in the extraction of materials from as well as displacement of waste to the South This volume represents a set of tightly interlinked papers with the aim to

assess ecologically unequal exchange and to move it forward Chapters are organised into three main sections theoretical foundations and critical reflections on ecologically unequal exchange empirical research on mining deforestation fisheries and the like and strategies for responding to the adverse consequences associated with unequal ecological exchange Scholars as well as advanced undergraduate and graduate students will benefit from the spirited re evaluation and extension of ecologically unequal exchange theory research and praxis **National Climate Change Acts** Thomas L

Muinzer,2020-12-10 This groundbreaking book collects contributions from many of the world s leading climate and energy law scholars and provides the first major study of national Climate Change Acts This cutting edge type of legislation originated with the first Climate Change Act framework which was passed in the United Kingdom in 2008 and is intended to enable the law to grapple effectively with one of the great problems of our times anthropogenic climate change Since 2008 national framework climate legislation has been slowly but steadily emerging in countries across the world This trailblazing collection employs a comparative analytical legal methodology and offers the first comprehensive study of this new innovative form of legislative regime In addition to containing broad internationalist chapters deep dive national case study chapters are included that focus on individual countries and provide analytical depth A final chapter draws together the threads of the book s foregoing contributions to deduce generalisable conceptual insights based on current knowledge and experience Uniquely the book provides a conceptual model for Climate Change Acts that can usefully inform the development of national framework climate legislation in all countries *The European Union and Regionalism* ,2025-10-06 While the EU is the most emblematic Regional International Organization RIO the regional perspective is largely absent in debates about the EU s identity and external posture What does the regional lens offer to the study of EU law How is the regional dimension reflected in EU policymaking and how does it impact norm production This book offers the first critical legal account of the EU as a RIO It brings together scholars from different disciplines to reflect on the construction use and misuse of the region in EU law and practice and to examine how this dimension interacts with other RIOs Regional Environmental

Cooperation in South America Karen M. Siegel,2017-08-16 This book examines cooperation on shared environmental concerns across national boundaries in the Southern Cone region of South America specifically Argentina Brazil Paraguay and Uruguay It covers regional environmental cooperation in the Southern Cone since the early 1990s By using the marginalised issues of ecological and socio environmental concerns as an analytical lens the author makes a significant contribution to the study of regional cooperation in Latin America Her book also presents the first detailed study of how environmental cooperation across national boundaries takes place in a region of the South and thus fills a lacuna in global environmental governance This innovative work is geared toward students and scholars of environmental politics regional cooperation in Latin America and transboundary environmental governance **Renewable Energy Uptake in Urban**

Latin America Alexandra Mallett,2020-03-05 This book explores the perplexing question of how to increase sustainable

energy technology use in the developing world and specifically focuses on two megacities within Latin America Renewable Energy Uptake in Urban Latin America examines the market and uptake of two sustainable energy technologies solar water heaters and biogas to produce electricity in two locations Mexico City Mexico and S o Paulo Brazil in the 2000s Drawing from three systems based analytical frameworks including one developed by the author for the purpose of this study the book examines the varying factors affecting the implementation of renewable energy technologies RETs in urban Latin America These frameworks emphasize the importance of examining socio political dimensions rather than conventional explanations that focus on technical and economic aspects only By doing so the research improves explanations about renewable energy technology RET adoption in the global South These findings are useful for scholars policy makers and practitioners working on RET adoption resulting in a book which helps to inform wider debates regarding innovation decarbonization sustainability transitions and energy system change This book will be of great interest to students and scholars of energy transitions energy policy development studies and science and technology studies

Great Powers, Climate Change, and Global Environmental Responsibilities Robert Falkner, Barry Buzan, 2022 This book is the first of its kind to examine the role of great powers in the international politics of climate change It develops a novel analytical framework for studying environmental power in international relations what counts as a great power in the environmental field and what their special environmental responsibilities are In doing so the book connects International Relations IR debates on power inequality great powers and great power management with global environmental politics GEP scholarship The book brings together leading scholars in IR and GEP whose contributions focus on major environmental powers United States China European Union India Brazil Russia and international institutions and issue areas UN Security Council multilateral environmental agreements international climate leadership coal politics The contributors to this volume examine how individual great powers have responded to the global climate challenge and whether they have accepted a special responsibility for stabilizing the global climate They place emerging discourses on great power responsibility in the context of wider debates about international environmental leadership and climate change securitization And they provide new insights into how international power inequality intersects with the global ecological crisis and what special role great powers could and should play in the international fight against global warming

Climate Policy after the 2015 Paris Climate Conference Joanna Depledge, Jorge E. Viñuales, Emma Lees, David Reiner, 2021-12-14 The 2015 Paris Agreement marked a turning point in the global community s response to climate change For the first time almost all the world s nations put forward specific pledges to cut their greenhouse gas emissions with the aim of limiting global warming to well below 2 C and ideally 1.5 C The ten contributions in Climate Policy after the 2015 Paris Climate Conference provide a powerful and scholarly analysis of how this historic achievement came about With a new introduction providing an update on recent developments the other chapters in this book were originally published as a special issue of the journal Climate Policy

Regional Cooperation in Amazonia

Maria Antonia Tigre, 2017-08-28 In Regional Cooperation in Amazonia A Comparative Environmental Law Analysis Maria Antonia Tigre provides a broad overview of the international regional and national law applied to the Amazon rainforest and investigates efforts at regional cooperation for the protection of the Amazonian ecosystem For the last four decades cooperation among the eight countries in which the rainforest lies was primarily induced by the Amazon Cooperation Treaty ACT Originally adopted to ensure national sovereignty the ACT gradually evolved towards a framework for sustainable development Based on the challenges faced by the treaty and its subsequent instruments Maria Antonia Tigre analyzes ways in which the ACT can be more effectively applied leading to practical results that reduce deforestation These specifically relate to the enforceability of the right to the environment the implementation of protected areas and the development of financial mechanisms to fund initiatives
