Multiple Criteria Decision Making Methods with Multi-polar Fuzzy Information Muhammad Akram, Arooj Adeel, 2023-12-03 This book presents an extension of fuzzy set theory allowing for multi polar information discussing its impact on the theoretical and practical development of multi criteria decision making It reports on set of hybrid models developed by the authors and show how they can be adapted case by case to the lack of certainty under a variety of criteria Among them hybrid models combining m polar fuzzy sets with rough soft and 2 tuple linguistic sets and m polar hesitant fuzzy sets and hesitant m polar fuzzy are presented together with some significant applications In turn outranking decision making techniques such as m polar fuzzy ELECTRE I II III and IV methods as well as m polar fuzzy PROMETHEE I and II methods are developed The efficiency of these decision making procedures as well as other possible extensions studied by the authors is shown in some real world applications Overall this book offers a guide on methodologies to deal with the multi polarity and fuzziness of the real world problems simultaneously By including algorithms and computer programming codes it provides a practice oriented reference guide to both researchers and professionals working at the interface between computational intelligence and decision making

Decoding The Rise Of Made-in-china: Why The Continuity Of Catch-up Ladder Ultimately Matters Bin Guo, 2023-03-23 This book provides a novel theoretical framework to explain the real source of competitive advantage of Chinese manufacturing More importantly such a framework can be generalized to analyze the potential of catch up for large emerging economies in the globalization era The book also provides insights for policy makers to rethink their design of policies The rise of Made in China products has been widely attributed to low labour cost advantage and imitation advantage However as these two advantages are nearly innate to all late developing countries they cannot be regarded as the key factors that drive the rapid growth of China's manufacturing industry or China's economy over the past few decades In this book the author proposed a theory the catch up ladders theory to explain the rise of China's manufacturing industry The manufacturing advancement of any country is in essence a process of catching up in both market

and technology during which enterprises will form a ladder like holistic structure due to their differences in capabilities technology and market positioning In light of this the continuity of the catch up ladder will greatly determine the catch up efficiency of an industry and even a country at large Such a perspective is more applicable to large emerging economies especially those with over one hundred million population and thus huge potential domestic market demand Qué pasa ,2013 *Foreign Companies in Venezuela Yearbook* ,1999 **International Directory of Corporate Affiliations** ,1992 The Stanford Alumni Directory ,2004
