Help

The IP Allocation table lists DHCP clients and IP Allocated clients. You may want to create an IP Allocated client so that it will always get the same IP address. The IP Allocated clients are still configured as DHCP clients at the client end, but will always be served the same IP address by the device DHCP server.

To create an IP Allocated client select the [Allocate](#) button next to the client. The IP Allocation Entry section appears. Choose a Fixed address for the client and click "Save".

To change an IP Allocated client back to a normal DHCP client select it and click "Allocate". Then in the IP Allocation Entry section select "Address from DHCP pool" and click "Save".

Sometimes the lease and the LAN Host Discovery table will not change immediately. You may have to renew the lease or request service at the client for the change to complete.
