Nonlinear Pedagogy In Skill Acquisition An Introduction:

Nonlinear Pedagogy in Skill Acquisition Jia Yi Chow, Keith Davids, Chris Button, Ian Renshaw, 2021-12-30 Nonlinear Pedagogy is a powerful paradigm for understanding human movement and for designing effective teaching coaching and training programmes in sport exercise and physical education PE It addresses the inherent complexity in learning movement skills viewing the learner the learning environment and the teacher or coach as a complex interacting system The constraints of individual practice tasks provide the platform for functional movement behaviours to emerge during practice and performance The second edition includes new materials of practical theoretical and empirical relevance to enhance understanding of how to implement a Nonlinear Pedagogy to support learning in sport PE and physical activity There is updated in depth discussion on the various pedagogical principles that support Nonlinear Pedagogy and how these principles are applicable in learning designs in sports and physical education There is further emphasis on examining how transfer of learning is implicated in practice highlighting its relevance on skill adaptation and talent development The first part of the book updates the general theoretical framework to explain processes of skill acquisition and motor learning This edition draws clearer links between skill acquisition expertise and talent development focusing on how specificity and generality of transfer have a role to play in the development of learners The book defines Nonlinear Pedagogy and outlines its key principles of practice It offers a thorough and critical appraisal of the functional use of instructional constraints and practice design It discusses methods for creating challenging and supportive individualised learning environments at developmental sub elite and elite levels of performance The second part focuses on the application of Nonlinear Pedagogy in sports and PE There is a greater emphasis on helping applied scientists and practitioners understand the impact of Nonlinear Pedagogy on transfer of learning Every chapter is updated to provide relevant contemporary cases and examples from sport and exercise contexts providing guidance on practice activities and lessons Nonlinear Pedagogy in Skill Acquisition is an essential companion for any degree level course in skill acquisition motor learning sport science sport pedagogy sports coaching practice or pedagogy or curriculum design in physical education

Nonlinear Pedagogy and the Athletic Skills Model

James Rudd, Ian Renshaw, Geert Savelsbergh, Jia Yi Chow, Will Roberts, Daniel Newcombe, Keith Davids, 2021-06-27 This book offers an ecological conceptualisation of physical literacy Re embracing our ancestry as hunter gatherers we gain a new appreciation and understanding of the importance of play not only in terms of how children learn but also in showing us as educators how we can lay the foundations for lifelong physical activity The concept of physical literacy has been recognised and understood throughout history by different communities across the globe Today as governments grapple with the multiple challenges of urban life in the 21st century we can learn from our forebears how to put play at the centre of childrens learning in order to build a more enduring physically active society This book examines contemporary pedagogical approaches such as constraints led teaching nonlinear pedagogy and the athletic skills model which are underpinned by the

theoretical framework of Ecological Dynamics It is suggested that through careful design these models aimed at children as well as young athletes can i encourage play and facilitate physical activity and motor learning in children of different ages providing them with the foundational skills needed for leading active lives and ii develop young athletes in elite sports programmes in an ethical enriching and supportive manner Through this text scientists academics and practitioners in the sub disciplines of motor learning and motor development physical education sports pedagogy and physical activity and exercise domains will better understand how to design programmes that encourage play and thereby develop the movement skills self regulating capacities motivation and proficiency of people so that they can move skilfully effectively and efficiently while negotiating changes throughout the human lifespan
