

NCIC Fingerprint Classification

The NCIC method of fingerprint classification is utilized in many ways by the criminal justice system to better establish the identity of an individual.

When a wanted person's fingerprint classification is available, the NCIC FPC should always be included in the wanted person's record for entry into the TIME System/Wanted/Warned Persons File.

While not a positive identifier, the NCIC fingerprint classification can be of assistance in identifying a person as a suspected wanted person, or a suspect in a criminal investigation. It is also included on the Crime Information Bureau Identification Transcript as an additional identifier. The use of the NCIC FPC in communications is less subject to error in transcription than the Henry Classification and is convenient to the Henry Classification for searching fingerprint files.

A typical NCIC classification might appear as such: **FPC/ 12 PL PD PM ST 12 PQ 12 PR CR**

The NCIC FPC formula is printed in a straight line of 26 alphabetic and numeric characters, beginning with the right thumb as number 1, and continuing through number 10 with the left thumb being number 0. Two characters are to be used for each finger as shown in the following table:
