Norway Country Study Guide Volume 1 Strategic Information and Developments IBP, Inc., 2015-04-13 Norway Country Study Guide Strategic Information and Developments **Norway Country Study Guide Volume 1 Strategic Information and Developments** IBP USA, Petroleum Exploration and Exploitation in Norway Norsk petroleumssforening. Conference, 1995 This conference was arranged by the Norwegian Petroleum Society in order to commemorate the first 25 years of exploration on the Norwegian Continental Shelf Sixty papers and posters were presented of which 25 have been selected for this volume Since the start of exploration activities during the mid 1960 s the North Sea has not only proved to be one of the main petroleum provinces in the world but has also established itself as an excellent laboratory for geoscientific research and application This development has been stimulated greatly by the openness towards exchange of technical data encouragement by the Norwegian authorities The objective of this book is to assess the results of 25 years of exploration in Norway It focuses on lessons learned from past experiences as well as considering future challenges facing geoscientists in the industry relating to both exploration and exploitation activities Included are papers which assess the status and future trends of exploration in the main geological provinces on the Norwegian Continental Shelf from the Central Graben in the

south to Svalbard and the Russian Arctic in the north Norwegian Maritime Explorers and Expeditions Over the Past Thousand Years Øystein Johansen, 1999 Norwegian maritime explorers and expeditions take you on the greatest journeys of discovery over a thousand years Throughout Norwegian history the sea has been the most important highway used by Norwegians in their travels along our almost 2000 kilometre long coast or to more distant destinations Some explorers set off in search of new territories for commercial reasons like Viking Ottar around the year 890 A D and Leif Eiriksson in 999 A D Jens Munk in 1619 or Carl Anton Larsen and Otto Sverdrup in the twentieth century Others like Fridtjof Nansen and Roald Amundsen had a burning desire to explore new countries and realize personal ambitions or like Thor Heyerdahl they have wanted to prove a theory about ancient vessels and their ability to cross oceans All these explorers have one key characteristic in common they look upon the sea as a natural element to be mastered but not conquered They conducted their expeditions on nature's own terms in spite of the risks involved The chapters of this book tell stories of daring courage stubborn endurance and scientific curiosity and the drama and tension derive not only from the explorers struggle with the forces of nature but also from the outstanding personalities of the men who made these journeys Publisher's description

Exploration Michael Allaby, Richard Garratt, 2010 Exploration tells the intriguing story of the navigators who crossed oceans to chart the coastlines of distant continents the adventurers who traversed deserts and polar wastes and the traders who sought new markets and commodities in faraway lands The secrets of the planet and its living inhabitants have been unraveled thanks to the efforts made by these navigators and adventurers This new full color book begins with a narration of the earliest seagoing ships and the vehicles that transported diplomats warriors and merchants around the Mediterranean region and later around the world It explores the Vikings who terrorized Western Europe and colonized Greenland as well as the swift outrigger vessels that sailed from Asia to the islands of the Pacific This accessible resource describes the development of navigational instruments to help on long journeys out of sight of land including the sextant and compass and explains how to calculate latitude and longitude *Petroleum Geochemistry in Exploration of the Norwegian Shelf* Norwegian Petroleum Society, 2012-12-06 This volume is the record of a three day symposium entitled Organic Geochemistry in Exploration of the Norwegian Shelf which was sponsored by the Norwegian Petroleum Society Norsk Petroleumsforening and held at the Rogaland Regional College Stavanger on 22-24 October 1984 Twenty nine papers were presented and all but one are published in full herein The aim of the conference was to focus on the application of geochemical methods to the current and highly active exploration of the Norwegian offshore Emphasis was on practical interpretation and case histories rather than laboratory methods and techniques and a strong attendance was sought among geologists and seismic interpreters active in exploration in Norway and Northwest Europe generally On all counts the symposium was a great success with a total of 213 participants registered In his opening address Mr Egil Bergsager director of the Norwegian Petroleum Directorate observed that during the 1970s petroleum geochemistry emerged from being a

somewhat academic pursuit into a practical aid in exploration for hydrocarbons This first stage when many of the basic methods were developed has now led in the 1980s to an expansion into applications in regional geological studies including mathematical modelling of thermal history hydrocarbon migration and basin development **Explorer's Guide Maine**

National-Socialism Sarah K. Danielsson,2016-03-16 Whilst terms such as Lebensraum are commonly associated with National Socialist ideology of the 1930s and 40s ideas of racial living space were in fact generated in the previous decades by an international geographic community of explorers and academics Focusing on one of the most influential figures within this group Sven Hedin this is the first study that systematically connects the geographic community to the intellectual history of the development of National Socialist ideology and genocidal practices The book demonstrates how colonial racial and nationalistic policies were often spearheaded by explorers and geographers such as Hedin In Germany Britain France and Russia their positions as publicly recognized authors and reputable academics made them highly influential with politicians Whilst this influence was to become most visible within Hitler s Germany the debates were not by any means restricted to or even originated in Germany Germany was the home of some of the most prominent geographers but this scientific community had a tradition of international debate and exchange with especially British French and Russian geographic societies and institutions Many issues that were later discussed and championed by National Socialist ideology were aired and debated in this international setting raising important questions about the international character and impact of National Socialism Tracing the intellectual history of the international geographic community and its relationship to National Socialism this study provides an assessment of Hedin s close involvement with the Nazi elite as a culmination of decades of political and scientific work In so doing the book uncovers a long ignored or overlooked important connection between exploration geographers and genocide
