**Information Processing and Biological Systems** Samuli Niiranen, Andre Ribeiro, 2011-03-10 Living beings require constant information processing for survival In cells information is being processed and propagated at various levels from the gene regulatory network to chemical pathways to the interaction with the environment How this is achieved and how information is coded is still poorly understood For example what a cell interprets as information in the temporal level of an mRNA and what is interpreted as noise remains an open question Recently information theoretical methods and other tools developed in the context of engineering and natural sciences have been applied to study diverse biological processes This book covers the latest findings on how information is processed in various biological processes ranging from information processing and propagation in gene regulatory networks to information processing in natural language An overview is presented of the state of the art in information processing in biological systems and the opinion of current leaders in this research field on future research directions

**Lateral Preferences and Human Behavior** Clare Porac, Stanley Coren, 2012-12-06 Lateral preferences are strange puzzling and on the surface not particularly adaptive aspects of behavior Why one chooses habitually to write or to brush the teeth with the right hand while a friend or family member habitually uses the left hand might be interesting enough to elicit some conversation over dinner or a drink but certainly does not seem to warrant serious scientific study Yet when one looks at human behaviors more carefully one becomes aware that asymmetrical behaviors favoring one side or the other are actually a fairly universal characteristic of human beings In the same way that we are right or left handed we are also right or left footed eyed and eared As a species we are quite lopsided in our behavioral coordinations furthermore the vast majority of us are right sided Considering that we are looking at a sizable number of behaviors and at a set of biases that seem to be systematic and show a predictable skew in the population the problem takes on greater significance The most obvious form of lateral preference is of course handedness When studying behavioral asymmetries this

is the issue with which most investigators start Actually we entered this research area through a much different route Around 1971 we became interested in the problem of eye dominance or eye preference This is a behavior where the input to one eye seems to be preferred over that to the other in certain binocular viewing situations *Primate Laterality* Jeannette P. Ward, William D. Hopkins, 2012-12-06 This book arrays recent research on the neural and behavioral lateralization of the brain relying heavily on animal models The authors employ the comparative method to enhance our understanding of behavior specifically through hand use and handedness by drawing comparisons with studies involving primates Topics discussed include Patterns of Lateralized Behavior in Prosimians Behavioral Lateralization in Language Trained Chimpanzees Patterns of Handedness Comparative Study of Nursery School Children and Captive Gorillas and Rotational Behavior in Children and Adults It is the first book of its kind devoted entirely to the question of behavioral asymmetries in all primates and thus presents a milestone as it recognizes the accumulating evidence of asymmetry and lateralized behavior in the non human nervous system **Advances in Limbic System Research and Application: 2012 Edition**, 2012-12-26 Advances in Limbic System Research and Application 2012 Edition is a ScholarlyEditions eBook that delivers timely authoritative and comprehensive information about Limbic System The editors have built Advances in Limbic System Research and Application 2012 Edition on the vast information databases of ScholarlyNews You can expect the information about Limbic System in this eBook to be deeper than what you can access anywhere else as well as consistently reliable authoritative informed and relevant The content of Advances in Limbic System Research and Application 2012 Edition has been produced by the world's leading scientists engineers analysts research institutions and companies All of the content is from peer reviewed sources and all of it is written assembled and edited by the editors at ScholarlyEditions and available exclusively from us You now have a source you can cite with authority confidence and credibility More information is available at <http://www.ScholarlyEditions.com> *Honden trainen volgens de regels van de natuur met de roedelmethode* Arjen van Alphen, Francien Koeman, 2013-01-29 Iedere hondliefhebber is ervan overtuigd dat de eerste levensfase van een pup in het nest erg belangrijk is Hier leert hij de beginselen van de hondentaal het sociale leren Toch is dit het eerste boek waarin het sociale leren van honden uitgebreid beschreven staat Een onmisbaar boek voor elke hondeneigenaar over wat een hond leert en vooral welke betekenis hetgeen hij leert heeft in zijn eigen hondentaal Het perspectief van onze hond is hondentaal die bestaat uit geurentaal lichaamstaal en de combinatie van die twee Mensen zijn juist verbaal en visueel ingesteld Geur en lichaamstaal zijn voor ons onbekende taalaspecten Hierdoor bekijken wij de hondentaal bijna onoverkomelijk vanuit onze menselijke beleving en zijn de hondse taalaspecten in de dagelijkse praktijk van de opvoeding nauwelijks terug te vinden Door ons te verdiepen in het hondse perspectief in zijn sociale leren zijn geur en lichaamstaal kunnen we miscommunicatie voorkomen en de taal van onze hond beter begrijpen verstaan en spreken Stap voor stap aan de hand van herkenbare voorbeelden uit de praktijk wordt u meegevoerd in de belevingswereld en de eigen taal van uw hond zowel theoretisch als in
