Vaccination Investigation Tara Haelle, 2018-01-01 Vaccines are biological substances that cause the human immune system to build up its defenses against specific diseases Public health officials recommend a series of vaccines for all children

as well as some vaccines for teenagers and adults But not everyone gets the vaccines they need Many poor nations don't have the resources to deliver vaccines to every community Some parents refuse to have their children vaccinated because they don't believe the evidence proving that vaccines are safe The effort to wipe out diseases using vaccines continues Vaccine Investigation recounts the fascinating history of vaccines their important role in protecting community health and the excitement of cutting edge research

Inside the AIDS Fight Harry W. Haverkos, M.D., 2025-06-06 Dr Harry W Haverkos had his first encounter with an AIDS patient in 1980 Three years later he challenged the widely accepted belief that the sole cause of AIDS was HIV proposing that factors like nitrite inhalants and cytomegalovirus also played a role in AIDS progression In his investigations of the disease with the CDC's Epidemic Intelligence Service the US Public Health Service and the US Department of Health and Human Services his research allowed for the implementation of preventative measures against the transmission of HIV and AIDS Dr Haverkos work not only achieved medical advancements but also profoundly affected the AIDS pandemic his research and collaborations with other medical professionals impacted health policy medical research legal and judicial perceptions and patient self advocacy This memoir follows Dr Haverkos career and contributions to our modern understanding of the AIDS pandemic In it Dr Haverkos advocates for a broader understanding of AIDS and a nuanced perspective on infectious diseases inviting us to rethink preconceived notions and cultivate a more comprehensive view of this global health challenge
