electronic and mechatronic systems to restore or compensate impaired neural functions. Importantly, the book merges different perspectives such as the clinical neurophysiological and bioengineering ones to promote and encourage collaborations between clinicians, neuroscientists and engineers. Based on the 2016 International Conference on Neurorehabilitation ICNR 2016 held on October 18-21, 2016 in Segovia, Spain, this book covers various aspects of neurorehabilitation research and practice, including new insights into biomechanics, brain physiology, neuroplasticity and brain damages and diseases, as well as innovative methods and technologies for studying and/or recovering brain function from data mining to interface technologies and neuroprosthetics. In this way, it offers a concise yet comprehensive reference guide to neurosurgeons, rehabilitation physicians, neurologists and bioengineers. Moreover, by highlighting current challenges in understanding brain diseases, as well as in the available technologies and their implementation, the book is also expected to foster new collaborations between the different groups, thus stimulating new ideas and research directions. **Braddom's**
