"The Sacred and the Profane - Environmental Anthropology of Ethiopian Orthodox Christianity" Gebrehiwot Gebreslassie Zesu, 2014-02-01 The Orthodox Tewahedo Christian doctrine in Ethiopian practice has different possibilities a within church compounds the protection of nature respect of creation b outside the submission of nature as the Bible demands both are Christian behaviors Church is not pro nature The Church itself has set up a partition into sacred and profane with different rule for both spheres both systems of rules exist parallel The followers respect the plants and animals in the church compound as end by themselves than a means to their economic objectives they respect them not for their economic value rather for their perceived duty respect to God as Church is the house of God The people do not consider the plants and animals in the Church as simply normal animals rather they are believed to have a metaphysical divine power Hence it is impossible to put the follower s ethical perspective in exclusive manner rather it is both anthropocentric and deep ecological which can be determined by the nature of the space occupied by the recourses

Worlds Enough Elaine Freedgood, 2022-01-11 A short provocative book that challenges basic assumptions about Victorian fiction Now praised for its realism and formal coherence the Victorian novel was not always great or even good in the eyes of its critics As Elaine Freedgood reveals in *Worlds Enough* it was only in the late 1970s that literary critics constructed a prestigious version of British realism erasing more than a century of controversy about the value of Victorian

fiction Examining criticism of Victorian novels since the 1850s Freedgood demonstrates that while they were praised for their ability to bring certain social truths to fictional life these novels were also criticized for their formal failures and compared unfavorably to their French and German counterparts She analyzes the characteristics of realism denotation omniscience paratext reference and ontology and the politics inherent in them arguing that if critics displaced the nineteenth century realist novel as the standard by which others are judged literary history might be richer It would allow peripheral literatures and the neglected wisdom of their critics to come fully into view She concludes by questioning the aesthetic racism built into prevailing ideas about the centrality of realism in the novel and how those ideas have affected debates about world literature By re examining the critical reception of the Victorian novel Worlds Enough suggests how we can rethink our practices and perceptions about books we think we know

Why Environmental Policies Fail Jan Laitos, 2017-07-25 This book is for those who are not just interested in the ways humans have harmfully altered their environment but instead wish to learn why the many governmental policies in place to curb such behavior have been unsuccessful Since humans began to exploit natural resources for their own economic ends we have ignored a central principle nature and humans are not separate but are a unified interconnected system in which neither is superior to the other Policy must reflect this reality We failed to follow this principle in exploiting natural capital without expecting to pay any price and in hurriedly adopting environmental laws and policies that reflected how we wanted nature to work instead of how it does work This study relies on more accurate models for how nature works and humans behave These models suggest that environmental laws should be consistent with the laws of nature
