Psychoanalysis Of Fire

Gaston Bachelard

Psychoanalysis Of Fire:

The Psychoanalysis of Fire Gaston Bachelard, 1964 Bachelard is neither a self confessed and tortured atheist like Satre nor like Chardin a heretic combining a belief in God with a proficiency in modern science But within the French context he is almost as important as they are because he has a pseudo religious force without taking a stand on religion To define him as briefly as possible he is a philosopher with a professional training in the sciences who devoted most of the second phase of his career to promoting that aspect of human nature which often seems most inimical to science the poetic imagination J G Weightman The New York Times Review of Books

Architecture and Fire Stamatis Zografos, 2019-06-12 Architecture and Fire develops a conceptual reassessment of architectural conservation through the study of the intimate relationship between architecture and fire Stamatis Zografos expands on the general agreement among many theorists that the primitive hut was erected around fire locating fire as the first memory of architecture at the very beginning of architectural evolution Following the introduction Zografos analyses the archive and the renewed interest in the study of archives through the psychoanalysis of Jacques Derrida He moves on to explore the ambivalent nature of fire employing the conflicting philosophies of Gaston Bachelard and Henri Bergson to do so before discussing architectural conservation and the relationship between listed buildings the function of archives and the preservation of memories from the past The following chapter investigates how architecture evolves by absorbing and accommodating fire while the penultimate chapter examines the critical moment of architectural evolution the destruction of buildings by fire with a focus on the tragic disaster at London s Grenfell Tower in 2017 Zografos concludes with thoughts on Freud s drive theory He argues the practice of architectural conservation is an expression of the life drive and a simultaneous repression of the death drive which suggests controlled destruction should be an integral part of the conservation agenda Architecture and Fire is founded in new interdisciplinary research navigating across the boundaries of architecture conservation archival theory classical mythology evolutionary theory thermodynamics philosophy and psychoanalysis It will be of interest to readers working in and around these disciplines

Contemporary Psychoanalysis and Jewish Thought Libby Henik, Lewis Aron, 2023-10-31 Demonstrating the connections between contemporary psychoanalysis Jewish thought and Jewish history this volume is a significant contribution to the traditions of dialogue debate and change within continuity that epitomize these disciplines The authors of this volume explore the cross disciplinary connections between psychoanalysis and Jewish thought while seeking out the resonance of new meanings to exemplify the uncanny similarities that exist between ancient Rabbinic methods of interpretation and contemporary psychoanalytic theory and methodology particularly the centrality of the question and the deconstruction of narrative In doing so this collaboration addresses the bi directional influence between and the relevance of the Jewish interpretive tradition and psychoanalysis to provide readers with renewed insight into key

topics such as Biblical text and midrash religious traditions trauma gender history clinical work and the legacies of the Holocaust on psychoanalytic theory Creating an intimate environment for interdisciplinary dialogue this is an essential book for students scholars and clinicians alike who seek to understand the continued significance of the multiple connections between psychoanalysis and Jewish thought

Encyclopedia of Contemporary Literary Theory Irene Rima Makaryk, 1993-01-01 The last half of the twentieth century has seen the emergence of literary theory as a new discipline As with any body of scholarship various schools of thought exist and sometimes conflict within it I R Makaryk has compiled a welcome guide to the field Accessible and jargon free the Encyclopedia of Contemporary Literary Theory provides lucid concise explanations of myriad approaches to literature that have arisen over the past forty years Some 170 scholars from around the world have contributed their expertise to this volume Their work is organized into three parts In Part I forty evaluative essays examine the historical and cultural context out of which new schools of and approaches to literature arose The essays also discuss the uses and limitations of the various schools and the key issues they address Part II focuses on individual theorists It provides a more detailed picture of the network of scholars not always easily pigeonholed into the categories of Part I This second section analyses the individual achievements as well as the influence of specific scholars and places them in a larger critical context Part III deals with the vocabulary of literary theory It identifies significant complex terms places them in context and explains their origins and use Accessibility is a key feature of the work By avoiding jargon providing mini bibliographies and cross referencing throughout Makaryk has provided an indispensable tool for literary theorists and historians and for all scholars and students of contemporary criticism and culture

La Psychanalyse du Feu Gaston Bachelard, 1985-01-01

Elemental Ecocriticism Jeffrey Jerome Cohen, Lowell Duckert, 2015-12-23 For centuries it was believed that all matter was composed of four elements earth air water and fire in promiscuous combination bound by love and pulled apart by strife Elemental theory offered a mode of understanding materiality that did not center the cosmos around the human Outgrown as a science the elements are now what we build our houses against Their renunciation has fostered only estrangement from the material world The essays collected in Elemental Ecocriticism show how elemental materiality precipitates new engagements with the ecological Here the classical elements reveal the vitality of supposedly inert substances mud water earth air chemical processes fire and natural phenomena as well as the promise in the abandoned and the unreal ether phlogiston spontaneous generation Decentering the human this volume provides important correctives to the idea of the material world as mere resource Three response essays meditate on the connections of this collaborative project to the framing of modern day ecological concerns A renewed intimacy with the elemental holds the potential of a more dynamic environmental ethics and the possibility of a reinvigorated materialism

[The Seasons Of Fire](#) David J. Strohmaier, 2021-08-15 Fire is a fearsome constant in the America West As the author David J Strohmaier notes Whether we have tended a campfire along Oregon s Deschutes River in March

engaged the advancing front of a Great Basin wildfire in the torrid heat of August or watched fire settle into the subdued smoldering leaf piles of October all of our lives to one degree or another are bracketed by fire In *The Seasons of Fire* Strohmaier effectively blends nature writing personal essay and philosophical analysis as he deliberately crosses disciplinary boundaries He discusses the moral dimensions of fire not only whether fires are good bad or indifferent phenomena but also how fire more generally understood shapes meaning for human life The consequences of discussing the moral side of fire speak directly to the contours of the human soul and to our sense of our place on the land Strohmaier a long term firefighter himself includes accurate and sometimes gut wrenching descriptions of the firefighter s experience
