excite their imaginations **Handbook of Autobiography / Autofiction** Martina Wagner-Egelhaaf, 2019-01-29

Autobiographical writings have been a major cultural genre from antiquity to the present time. General questions of the literary as e.g. the relation between literature and reality, truth and fiction, the dependency of author, narrator and figure, or issues of individual and cultural styles etc. can be studied preeminently in the autobiographical genre. Yet the tradition of life writing has in the course of literary history developed manifold types and forms. Especially in the globalized age where the media and other technological cultural factors contribute to a rapid transformation of lifestyles, autobiographical writing has maintained even enhanced its popularity and importance. By conceiving autobiography in a wide sense that includes memoirs, diaries, self-portraits and autofiction as well as media transformations of the genre, this three-volume handbook offers a comprehensive survey of theoretical approaches, systematic aspects and historical developments in an international and interdisciplinary perspective. While autobiography is usually considered to be a European tradition, special emphasis is placed on the modes of self-representation in non-Western cultures and on inter- and transcultural perspectives of the genre. The individual contributions are closely interconnected by a system of cross-references. The handbook addresses scholars of cultural and literary studies, students as well as non-academic readers.

Investigating the Stanford Prison Experiment
Thibault Le Texier, 2024-08-08

In 1971, psychologist Philip Zimbardo ran the now famous Stanford prison experiment to show that prison could make normal people behave in pathological ways. Based on the first thorough investigation in the archives of the experiment and on interviews with about half of its participants, this book shows that the Stanford prison experiment is far from being scientific. In particular, the guards knew what results were expected from them; they were trained and supervised by the experimenters and they were following a schedule and a set of rules written by the experimenters. The experimenters deceived the guards and made them believe they were not subjects. They also borrowed many elements from a previous student experiment without disclosing this information in their reports. The prisoners were not allowed to leave the experiment at will and they were conditioned by the experimenters. The mock prison situation was unrealistic. Most participants did not forget they were participating in an experiment and many responded to demand characteristics. The data was not collected properly. And the conclusions were pre-written according to non-academic aims. This book goes beyond the experiment to provide ample background and context in order to understand how the experiment was planned, financed, recorded and divulged in the press and within the academic. It discusses also the role played by Philip Zimbardo in the trial of one of the guards, Abu Ghraib, as well as the impact of mass media on science, the debates between personal psychology and social psychology, and the specific nature of cold-war social science.

Introduction to Psychology and Behaviour Science
Vidya Bhagat, 2017-05-07

In the field of psychology, there are many books which are of interest to the students of psychology.
