Propertied Self Psychology Economic History:

The History of Japanese Psychology Brian J. McVeigh, 2016-12-15 Through a focus on the contributions of pioneers such as Motora Yujiro 1858 1912 and Matsumoto Matataro 1865 1943 this book explores the origins of Japanese psychology charting cross cultural connections commonalities and the transition from religious moralistic to secular scientific definitions of human nature Emerging at the intersection of philosophy pedagogy physiology and physics psychology in the late 19th and early 20th centuries confronted the pressures of industrialization and became allied with attempts to integrate individual subjectivities into larger institutions and organizations Such social management was accomplished through Japan's establishment of a schooling system that incorporated psychological research making educational practices both products of and the driving force behind changing notions of selfhood In response to new forms of labor and loyalty applied psychology led to or became implicated in personality tests personnel selection therapy counseling military science colonial policies and national spirit The birth of Japanese psychology however was more than a mere adaptation to the challenges of modernity it heralded a transformation of the very mental processes it claimed to be exploring With detailed appendices tables and charts to provide readers with a meticulous and thorough exploration of the subject and adopting a truly comparative perspective The History of Japanese Psychology is a unique study that will be valuable to students and scholars of Japanese intellectual history and the history of psychology

The Propertied Self Brian J. McVeigh, 2015-12 This book was originally part of a much larger project tentatively entitled The Propertied Self Wealth Progress Human Nature This was an overly ambitious manuscript whose coherence was probably not obvious to many readers It was never published However portions that were not included in the work formed another book called A Psychohistory of Metaphors Envisioning Time Space and Self Through the Centuries which is now in progress The first draft of this book was much longer and included a chapter entitled The Aesthetics of the Propertied Self which explored in more detail how the emergence of the propertied self and changes in the human psyche impacted not just the political economic landscape but also influenced aesthetics Economic and political indicators dress fashion and lifestyle were investigated and linked to how transformation in practices of wealth acquisition over an individual's lifetime led to new notions of time and self narration For example a section called The Aesthetics of Atomized Individuation explored the psycho politics of obsessive cleanliness I also discussed how technological advances that led to the invention of new spaces of consumutopia such as cyberspace elaborated and reshaped psychological interiority in new ways Examples drawn from popular culture were intended to demonstrate these changes These topics will have to wait for another publishing opportunity Julian Jaynes once advised me that the best way to read William James's The Principles of Psychology was not from beginning to end but to dip into it here and there I suspect we would appreciate many other books if this advice were followed I am tempted then to suggest that this book be read in the same way not because it is on intellectual par with The Principles of Psychology but because books rather than disputations in orderly logic are more often

extended conversations between author and reader Consciousness is a vague multi referential term so I will devote some space to carefully defining it But in order to add some clarity and specificity to my usage throughout this book I use the synonymous expressions such as conscious interiority interiorised experiences and interiority Finally the careful reader will note the difference between my use of Psyche meaning mind with the italicised psyche which refers to the ancient Greek concept of soul Finally note that my use of personalty is not a typo ie I do not mean personality The former term is a legal concept describing a kind of property

The Psychology of the Bible Brian J. McVeigh, 2020-09-17 Fire and brimstone bellowing prophets and a good dose of old fashioned sermonizing these are the images the Bible brings to mind But this assortment of sacred writings in particular the Old Testament is more than a collection of colorful allegories or miracles and morals mythology Though written in the first millennium BCE these holy writings are a nostalgic recounting of a lost super religious mentality that characterized the Bronze Age The Psychology of the Bible explores how the Old Testament provides perspective into the tumultuous transition from an earlier mentality to a new paradigm of interiorized psychology and introspective religiosity that came to characterize the first millennium BCE By examining the Old Testament s historical background and theopolitical context utilizing linguistic analysis and applying systems and communication theory this book interprets biblical passages through a new lens It analyzes divine voices visions and appearances of heavenly messengers angel and prophets as neurocultural phenomena and explains why they were so common This book also answers why definitions of God changed so radically illuminates the divinatory role of idols and other oracular aids e g the Ark of the Covenant provides a framework for appreciating why wisdom literature became so significant and clarifies the linkages among music poetry and inspiration

How Religion Evolved Brian McVeigh, 2017-07-12 Why did many religious leaders Moses Old Testament prophets Zoroaster claim they heard divine voices Why do ancient civilizations exhibit key similarities e g the living dead treating the dead as if they were still alive speaking idols care and feeding of effigies monumental mortuary architecture and houses of gods pyramids ziggurats temples How do we explain strange behaviour such as spirit possession speaking in tongues channelling hypnosis and schizophrenic hallucinations Are these lingering vestiges of an older mentality Brian J McVeigh answers these riddles by updating bicameralism First proposed by the psychologist Julian Jaynes this theory postulates that an earlier mentality existed a human the brain s left hemisphere heard voices of gods or ancestors the brain s right hemisphere Therefore ancient religious texts reporting divine voices were recounting of audio visual hallucinations a method of social control when early populations expanded As growing political economic complexity destabilized god governed states in the late second millennium BCE divine voices became inadequate Eventually humans had to culturally acquire new cognitive skills modern religions to accommodate increasing social pressures selves replaced the gods and history witnessed an inward turn This psychological interiorization of spiritual experience laid the foundations for the world s great religions and philosophies that arose in India China Greece and the Middle East in the middle of the first millennium

BCE **The "Other" Psychology of Julian Jaynes** Brian J. McVeigh, 2018-01-17 In his provocative but critically acclaimed theory about the origin of introspectable mentality Julian Jaynes argued that until the late second millennium people possessed a different psychology a two chambered bicameral neurocultural arrangement in which a commanding god guided admonished and ordered about a listening mortal via voices visions and visitations Out of the cauldron of civilizational collapse and chaos an adaptive self reflexive consciousness emerged better suited to the pressures of larger more complex sociopolitical systems Though often described as boldly iconoclastic and far ahead of it time Jaynes s thinking actually resonates with a second or other psychological tradition that explores the cultural historical evolution of psyche Brian J McVeigh a student of Jaynes points out the blind spots of mainstream establishment psychology by providing empirical support for Jaynes s ideas on sociohistorical shifts in cognition He argues that from around 3500 to 1000 BCE the archaeological and historical record reveals features of hallucinatory super religiosity in every known civilization As social pressures eroded the god centered authority of bicamerality an upgraded psychology of interiorized self awareness arose during the Late Bronze Age Collapse A key explanatory component of Jaynes s theorizing was how metaphors constructed a mental landscape populated with I s and me s that replaced a declining worldview dominated by gods ancestors and spirits McVeigh statistically substantiates how linguo conceptual changes reflected psychohistorical developments because supernatural entities functioned in place of our inner selves vocabularies for psychological terms were strikingly limited in ancient languages McVeigh also demonstrates the surprising ubiquity of hearing voices in modern times contending that hallucinations are bicameral vestiges and that mental imagery a controllable semi hallucinatory experience is the successor to the divine hallucinations that once held societies together This thought provoking work will appeal to anyone interested in the transformative power of metaphors the development of mental lexicons and the adaptive role of hallucinations **The Vestiges of Japanese Spirituality** Brian J. McVeigh, 2025-10-02 By positioning Japan within a global perspective this work challenges the black box approach to psyche dominating studies in the history of religion Brian J McVeigh employs a cultural psychological analysis by first highlighting the conceptual obstacles hindering the psychology of religion such as neglecting sociohistorical forces that shape mental processes Next by exploring shamanism divination and the mountain asceticism or Shugendo he contextualizes the historical background of Japanese religion He argues that current practices of Japan s new religions are relics of an earlier mentality that has been creatively renovated and re adapted for the present day This is demonstrated by investigating spirit possession a vestige of an obsolete neurocultural arrangement Unlike other works this book treats possession as a legitimate phenomenon in and of itself requiring explanatory analysis rather than dismissing it as a mere epiphenomenon This genuinely interdisciplinary work transcends mainstream academic fields and will appeal to readers interested in Japanese and Asian religions and the psychology of religion *Psychology Library Editions: Social Psychology* Various, 2021-07-09 Psychology Library Editions Social Psychology 30 volume set brings together an eclectic mix

of titles from a wealth of authors with diverse backgrounds seeking to understand human behaviour and interaction from a socio psychological perspective The series of previously out of print titles originally published between 1908 and 1993 includes those from some authors considered to be founders of social psychology and traces the development of the subject from its early foundations

Property Ernest Beaglehole,2015-06-19 First published in 1931 this book represents an attempt to study the psychological basis of the institution of property There had been many psychological and social studies of marriage and religion prior to publication of this title but none which considered the problems which arise when the institution of property is viewed from the angle of social psychology Some of these problems are set out in the first chapter In the remaining chapters the author discusses the problems in the light of evidence drawn from the various branches of psychology and sociology of the day The final chapter indicates the importance of the author s conclusions for political and social theory at the time

Economic Behavior and Institutions Þráinn Eggertsson,1990-06-29 This book is a comprehensive survey of neoinstitutional economics which integrates different economic theories

Institutions, Property Rights, and Economic Growth Sebastian Galiani,Itai Sened,2014-04-17 This volume showcases the impact of the work of Douglass North father of the field of new institutional economics
