The Very Old Critically Ill Patients Hans Flaatten, Bertrand Guidet, Hélène Vallet, 2022-08-03 This book part of the European Society of Intensive Care Medicine ESICM textbook series provides detailed up to date information on the care of the critical ill very old 80 years patients in the ICU The very old are expanding fast in our populations and this is mirrored in our

hospitals and ICUs as well. During the last decade a lot more information about the group of critical ill elderly has been published and several large networks cooperate in performing multinational studies in this field one of them with roots in the ESICM. This book will give readers knowledge about the current epidemiology of elderly ICU patients in patients centered outcomes and factors affecting these outcomes. A large part is devoted to age related changes in vital organ functions and the specific geriatric syndromes like frailty cognitive decline reduced activity of daily living sarcopenia and immunosenescence. This is all important for the practicing intensivists to know about. In addition specific groups of the elderly in the ICU are also described like the elderly patients with trauma or sepsis. The book is written jointly by intensivists and geriatricians often working in teams and originating from many different countries. This herald a new era in the collaboration between these two groups in order to improve care and rehabilitation. We have a lot to learn from each other as both groups have a holistic view of our patients although with different perspectives. This book should be of value for all working in adult ICUs physicians as well as nurses. It will hopefully lead to a better understanding of the particular challenges posed by this important sub group of ICU patients and how to manage his group in a way that combine respect for life as well as death and includes patients and caregivers in this process.

Medical Prophecy in Critical Illness Lucas Stange Zier,2007 **Cumulated Index Medicus** ,1996 *The Cicada Prophecy* J. R. McLeay,2015-02-01 MANKIND S GREATEST DREAM THE CONQUEST OF DEATH IS FINALLY REALIZED BUT IT COMES WITH A CATCH In the near future medical science discovers the secret to achieving immortality and eternal youth. But in order to preserve everyone's youthful vitality they must undergo an operation before passing into adulthood that locks their body in the form of a pre adolescent eleven year old. Under the auspices of the United Nations Global Longevity Initiative led by brilliant neurosurgeon Dr Richard Ross the program promises a peaceful utopian society where emotionally and intellectually mature juveniles rule the world. But not everyone is happy with the new arrangement. A small but passionate group of rebels from the Garden of Eden church led by the mercurial Calvin James plots to overthrow the new regime and return the world to its natural order. Starting with a shocking revelation at the end of the first chapter the idyllic setting is quickly overturned through a series of sinister schemes and escalating medical complications where suddenly the world finds itself on the brink of imminent extinction. Building to an exciting climax Dr Ross and his endocrinologist girlfriend must save the one remaining adult female queen whose mature eggs represent the final link to the continuity of the human race. Intensive Care Medicine Mr. Rohit Manglik,2024-05-24 In depth clinical guide to the diagnosis and management of critically ill patients in ICU settings including protocols and monitoring Critical Care Neurology Part II ,2017-01-25 Critical Care Neurology Part II Neurology of Critical Illness focuses on the care specialists and general neurologists that consult in the ICU and their work with patients in acute life threatening situations who are dealing with neurologic or

neurosurgical crises emanating from either a preexisting neurologic syndrome or from a new neurologic complication appearing as a result of another medical or surgical critical illness. These two separate clinical situations form the pillars of neurocritical care; hence these practices are addressed via two separate but closely related HCN volumes. Chapters in both focus on pathophysiology and management and are tailored for both general neurologists and active neurocritical specialists with a specific focus on management over diagnostics. Part I addresses the principles of neurocritical care and the management of various neurologic diseases. Part II addresses the interplay between neurologic complications and the surgical, medical, cardiac, and trauma of critical illnesses that most typically present in the ICU. Provides an essential neurocritical care overview for general neurologists. Presents neurocritical care specialists with an update on severe neurological illness management. Offers coverage of all the most frequent neurologic diseases requiring intensive care. Includes chapters authored by global leaders in the field providing the broadest, most expert coverage available on the topics discussed.
