Test Description

Microsoft Excel 2010 is a popular spreadsheet application. It is included in the Microsoft Office Package, which also includes Word and PowerPoint. The Microsoft Excel 2010 - Whole Test combines both the Normal and Power User Test.

The Microsoft Excel 2010 - Normal User test is designed to test clerical level users of Excel who are required to edit, develop, and create Excel Workbooks. This test assesses the user's ability to create and develop a basic Excel workbook, including the most commonly used commands for formatting cells, navigation through the application, using formulas, and changing the overall appearance of the spreadsheet.

The Microsoft Excel 2010 - Power User test attempts to provide the basis for separating candidates who possess limited exposure to Microsoft Excel 2010 from those who are conversant with the full functionality of the software. The primary topics include advanced formatting and formula writing. This test is designed to test candidates who will be required to use some of the more advanced features of the program on a regular basis.

Tests for Microsoft Word and Microsoft Outlook are also available.
