Structure of Solutions of Differential Equations Mitsuo

Morimoto, Takahiro Kawai, 1996 A collection of papers on current topics and future problems in the theory of differential equations which were reported at the Taniguchi symposium Katata and RIMS symposium Kyoto Painlevé transcendents Borel resummation linear differential equations of infinite order solvability of microdifferential equations Gevrey index etc are among them

THE WAVELET TRANSFORM Ram Shankar Pathak, 2009-11-01 The wavelet transform has emerged as one of the most promising function transforms with great potential in applications during the last four decades The present monograph is an outcome of the recent researches by the author and his co-workers most of which are not available in a book form Nevertheless it also contains the results of many other celebrated workers of the field The aim of the book is to enrich the theory of the wavelet transform and to provide new directions for further research in theory and applications of the wavelet transform The book does not contain any sophisticated Mathematics It is intended for graduate students of Mathematics Physics and Engineering sciences as well as interested researchers from other fields The Fourier transform has wide applications in Pure and Applied Mathematics Physics and Engineering sciences but sometimes one has to make compromise with the results obtained by the Fourier transform with the physical intuitions The reason is that the Fourier transform does not reflect the evolution over time of the physical spectrum and thus it contains no local information The continuous wavelet transform $W_{f,b,a}$ involving wavelet translation parameter b and dilation parameter a overcomes these drawbacks of the Fourier transform by representing signals time dependent functions in the phase space time frequency plane with a local frequency resolution The Fourier transform is p -restricted to the domain $L^p(\mathbb{R})$ with $1 \leq p \leq 2$ whereas the wavelet transform can be defined for $1 \leq p < \infty$
