Psychoanalysis History And Subjectivity Psychoanalysis History And Subjectivity:

Psychoanalysis, History and Subjectivity Roger Kennedy, 2014-04-04 Clinical psychoanalysis since Freud has put reconstruction of the patient's history at the forefront of its task but in recent years this approach has not been so prominent. This book aims to explore and re-evaluate the relationship between history and psychoanalysis. Roger Kennedy develops new perspectives on historiography by applying psychoanalytic insight to the key issues of narrative time and subjectivity in the construction of historical accounts. He also throws new light on the importance of history for and within psychoanalytic treatment. It is argued that human subjectivity is a major element in any historical enterprise both the subjectivity of the historian or clinician and that of those being studied. Illustrated with clinical examples. *Psychoanalysis History and Subjectivity* covers areas such as postmodernism, the nature of memory, clinical evidence and the place of trauma. *Psychoanalysis History and Subjectivity* will be of great interest both to professionals in the psychoanalytic and therapeutic fields and to historians.

Subjectivity within Cultural-Historical Approach Fernando González Rey, Albertina Mitjans Martínez, Daniel Magalhães Goulart, 2018-12-11 This book offers a theoretical and epistemological methodological framework as an alternative approach to the instrumental descriptive methodology that has prevailed in psychology to date. It discusses the differences between the proposed approach and other theoretical and methodological positions such as discourse analysis, phenomenology and hermeneutics. Further, it puts forward a proposal that allows the demands of studying subjectivity to be addressed from a cultural historical standpoint. The book mainly highlights case studies that have been conducted in various countries and which employ or depart from the theoretical, epistemological and methodological proposals that guide this book. The research discussed here introduces readers to new discussions on theoretical and methodological issues in subjectivity that have increasingly attracted interest.

Theory of Subjectivity from a Cultural-Historical Standpoint Daniel Magalhães Goulart, Albertina Mitjans Martínez, Megan Adams, 2021-06-14 This book examines key ideas related to the Theory of Subjectivity within a cultural historical approach. It brings together the intellectual contributions made by Professor Fernando González Rey (1949-2019) towards understanding human subjectivity and emphasizing their unfolding in different fields and contexts. The book addresses the genesis and development of González Rey's work articulating this discussion with the author's biography. González Rey's main scientific contribution is the Theory of Subjectivity in a cultural historical perspective which is inseparable from Qualitative Epistemology and from its constructive interpretive methodological expression. The book presents and discusses González Rey's contributions to different contexts and fields such as psychological research, education, cultural historical psychology, human development, motivation, human health and psychotherapy. This book brings together examples of how these ideas have been employed and developed in different fields and contexts.

Witnessing Kelly Oliver, 2001-01-03 Challenging the fundamental tenet of the multicultural movement that social struggles turning upon race gender and sexuality are struggles for recognition this work offers a powerful critique of current conceptions of identity and subjectivity based on Hegelian notions of recognition The author's critical engagement with major texts of contemporary philosophy prepares the way for a highly original conception of ethics based on witnessing Central to this project is Oliver's contention that the demand for recognition is a symptom of the pathology of oppression that perpetuates subject object and same different hierarchies While theorists across the disciplines of the humanities and social sciences focus their research on multiculturalism around the struggle for recognition Oliver argues that the actual texts and survivors accounts from the aftermath of the Holocaust and slavery are testimonials to a pathos that is beyond recognition Oliver traces many of the problems with the recognition model of subjective identity to a particular notion of vision presupposed in theories of recognition and misrecognition Contesting the idea of an objectifying gaze she reformulates vision as a loving look that facilitates connection rather than necessitates alienation As an alternative Oliver develops a theory of witnessing subjectivity She suggests that the notion of witnessing with its double meaning as either eyewitness or bearing witness to the unseen is more promising than recognition for describing the onset and sustenance of subjectivity Subjectivity is born out of and sustained by the process of witnessing the possibility of address and response which puts ethical obligations at its heart
