Christian from Egypt: Life Story of a Neurosurgeon Pursuing the Dreams for Quintuple Certifications RAMSIS F. GHALY MD FACS, 2015-01-23 This book is my life story as a Coptic Christian raised in Egypt Where no one from my family has ever moved away for thousands of years through the rise and falls of ancient pharaohs and deep roots of ancient Christianity It is also the story of my parents raising 10 children since 1953 in an environment of extreme poverty where resources and opportunities were limited with unrelenting prejudice towards Christian minorities So I came to the United States the land of opportunity and became a prominent American neurosurgeon among the only 4000 active nationwide and the only one nationally and internationally to achieve five board certifications in five acknowledged medical disciplines I continue to practice and serve the mission set before me My home land was once prosperous and rich in history Over the centuries it joined the downfall of the majority of the developing countries of the world through its economic crises and injustices to many It was the land for the fathers of early Christians and the foundation for worldwide Christians Now the Coptic Christians are considered a minority constituting a mere 10% of the population and are joining the exodus of ancient Christians from their native African continent This book chronicles my journey from the land of history the land of my birth to the land of opportunity America It outlines the socioeconomic and political changes that Egypt has seen over the last century It is my hope that others may find inspiration and understanding of my culture through reading this book I owe it all to Christ the Lord my cherished parents my family and friends my teachers my mentors and especially my beloved patients

The Social Organization of Best Practice Fiona Webster, 2020-06-24 This book explores how best practice for acute stroke care was developed translated and taken up in medical practice across various sites in the province of Ontario using institutional ethnographic research Institutional ethnography an approach developed by Dorothy E Smith builds on Smith's understanding of the social organization of knowledge allowing for an examination of the complex social relations organizing people's experiences of their everyday working lives This work thereby makes visible some of the assumptions and hidden priorities underlying the emphasis given to translating scientific knowledge into medical practice In this study the discourses of both evidence based medicine and knowledge translation purportedly designed to improve patient care come into view as managerial tools that directed healthcare resources toward academic hospitals rather than community sites where the

majority of patients receive care These models institutionalize inequities in access to care while claiming to resolve them
