Photochemical Conversion and Storage of Solar Energy E. PELIZZETTI,Mario Schiavello,2012-12-06 The book collects the lectures and the status

reports delivered during the Eighth International Conference on Photochemical Conversion and Storage of Solar Energy IPS 8 held in Palermo Italy from 15th to 20th of July 1990 As usual the main theme of the Conference was that of making the point about the trends and the developments of the studies related to the photochemical exploitation of solar energy and also

to report the main lines of potential applications Therefore the contributions reflect this point they vary from those reporting basic and fundamental theories to those reporting cases of possible applications For the sake of following the logical line which links each other the various contributions we report the six areas in which the main theme of the conference was divided a Electron and energy transfer in homogeneous and heterogeneous systems b Photosynthesis organized assemblies and biomimetic systems c Photoelectrochemistry d Photocatalysis homogeneous and heterogeneous regime e Environment photochemical and photocatalytic processes f Solar energy materials and photochemical engineering It remains now to thank persons and institutions which made possible the organization of the Conference The persons to thank are all the members of the International and National Organizing Committees and in particular Prof A Sclafani and Dr L Palmisano whose efforts were essential for the success of the Conference
