Westgeest,2024-09-03 While it has traditionally been seen as a means of documenting an external reality or expressing an internal feeling photography is now capable of actualizing never existed pasts and never lived experiences Thanks to the latest photographic technologies we can now take photos in computer games interpolate them in extended reality platforms or synthesize them via artificial intelligence To account for the most recent shifts in conceptualizations of photography this book proposes the term virtual photography as a binding theoretical framework defined as a photography that retains the efficiency and function of real photography made with or without a camera while manifesting these in an unfamiliar or noncustomary form Popular Photography ,1983-12 Photography, Ecology and Historical Change in the Anthropocene

Bergit Arends,2024-07-09 Moving beyond existing scholarship this book connects photography archives ecology and historical change and critically applies the Anthropocene as framework to the in depth study of artists projects It discards single modes of seeing environmental transformations in favour of a multiple and de centred environmental imagination Bergit Arends uses multidisciplinary perspectives to view localized environmental social and political issues through research based artistic practices The book not only makes available original research into newly and recently discovered archives of ecological and historical change but also shows how this research is manifest in exhibition formats This book presents international transhistorical projects by contemporary visual artists who use archives together with photography as documentary and performative media for the comparative study of environments and places A wide array of artists from diverse backgrounds working primarily in Europe and North America from the 1970s to the present day are discussed and set in relation to Anthropocene narratives Case studies include environmental archive based work by Nguyen the Thuc Christiane Eisler Chrystel Lebas Mark Dion Joy Gregory and Philip Miller The book will be of interest to scholars working in photography archive studies art history visual culture environmental humanities and ecocriticism Popular Photography
