won't see the world in the same light after reading this urgent and inspiring call to action. In this thought-provoking book, Dutch philosopher Floris van den Berg proposes a new perspective called universal subjectivism, which can be adopted by anyone regardless of religious or philosophical orientation. It takes into consideration the universal capacity for suffering and through raising awareness seeks to diminish that suffering and increase happiness. With consistent and compelling moral reasoning, van den Berg shows that the world can be organized to ensure more pleasure, beauty, justice, happiness, health, freedom, animal welfare, and sustainability. The author emphasizes that today the near-term future is our greatest challenge: our affluent western lifestyle will soon exceed the limits of the earth's sustainable capacity and must soon change drastically to ward off a worldwide environmental collapse. Knowing this, we should all reevaluate the daily routines we take for granted: taking the car to work, boarding a plane to a business or vacation destination, eating meat, or using plastic bags in stores. There are ethical and ecological objections to each of these examples. In fact, if we applied a strict ethical analysis to our lifestyle, almost nothing we do would pass muster. A lot of avoidable suffering attaches to our way of life. After reading this book, the world won't look the same. Concluding with an eco-humanist manifesto, this book not only offers much food for thought but more importantly, an urgent and inspiring call to action.

A Companion to Atheism and Philosophy Graham Oppy, 2019-03-22 PROSE 2020 Single Volume Reference Finalist

Philosophers throughout history have debated the existence of gods, but it is only in recent years that the absence of such a belief has become a significant topic of philosophical analysis, in particular for philosophers of religion. Although it is difficult to trace the historical contours of atheism as the lack of belief in a higher power, the reasoned, reflective, and thoughtful rejection of theism has become commonplace in many modern intellectual circles, including academic philosophy, where disciplinary data indicates that a large majority of philosophers self-identify as atheists. As the first book of its kind to bring together a collection of writing on the philosophical aspects of atheism, both historical and contemporary, *A Companion to Atheism and Philosophy* stages an explicit, constructive, and comprehensive conversation between philosophy and atheism to examine the ways in which atheist thought intersects with ideas and positions from a variety of philosophical and theological sub-disciplines. The Companion begins by addressing the foundational questions and lingering controversies which underpin philosophical thought about atheism, exploring the implications of major developments in the history of philosophy for the modern atheistic worldview. Divided into eight distinct sections, essays consider a range of thinkers who were widely believed to have been atheists, including David Hume, Mary Wollstonecraft, Karl Marx, and Elizabeth Cady Stanton, and survey different kinds of objections to theism and atheism, including logical, evidential, normative, and prudential. Later chapters trace the relationship between atheism and metaphysics, epistemology, ethics, and political philosophy, oriented around topics such as pragmatism, postmodernism, freedom, education, violence, and happiness. Deftly curated and thoughtfully composed, *A Companion to Atheism and Philosophy* is the most ambitious and authoritative account of philosophical thinking on atheism available and is a first-rate resource for academics.
