 National Science Library (Canada),1973 **Showcasing Space** Martin J. Collins,2005 This volume explores the meaning of
 space artifacts both as products of particular historical settings and as windows for understanding technological and cultural
 change Seven contributors most of whom are museum curators address these challenges through the history of particular
 artifacts highlighting differences and commonalities across technologies institutions professional communities projects and
 geographical contexts The essays sample the broad range of space activity from launch vehicles to satellites and space
 capsules from military to commercial and scientific purposes They include an exploration of the Black Arrow rocket project in
 Britain the European Launcher Development Organization the Apollo 204 spacecraft in the United States the Iridium
 commercial global satellite communications system the Soviet space program and rocket recovery in Australia What stories
 can space artifacts tell What kinds of information and experiences might real objects convey that images and representations
 do not Do they speak for themselves or do they represent a dense sediment of human agency culture and technology needing
 interpretation by experts And more particularly in what ways do space artifacts originating in Cold War culture pose
 historiographic questions and issues that do not arise from artifacts with other histories Questions such as these speak to the
 Artifacts series purpose To explore the overlapping interests of museums and historians of science and technology in
 understanding artifacts as well as presenting that understanding to scholarly and general publics This series is sponsored by
