Carraher,2012-12-06 The vast array of libraries in the world bear mute witness to the truth of the 3000 year old observation of King Solomon who stated of making many books there is no end and much study is a weariness of the flesh Yet books are an essential written record of our lives and the progress of science and humanity Here is another book to add to this huge collection but hopefully not just another collection of pages but rather a book with a specific purpose to aid in alleviating the weariness of the flesh that could arise from much studying of other journals and books in order to obtain the basic information contained herein This book is about polymeric materials and biological activity as the title notes Polymeric materials in the broad view taken here would include not only synthetic polymers e g polyethylene polyvinyl chloride polyesters polyamides etc but also the natural macromolecules e g proteins nucleic acids polysaccharides which compose natural tissues in humans animals and plants In the broad sense used here biological activity is any type of such action whether it be in medication pest control plant growth regulation and so on In short this book attempts to consider briefly the use of any type of polymeric material system with essentially any kind of biological activity *Hearings, Reports and Prints of the Senate Select Committee on Small Business* United States.
