Bartmanski, 2022-03-30 Symbols matter and especially those present in public spaces but how do they exert influence and maintain a hold over us Why do such materialities count even in the intensely digitalized culture This book considers the

importance of urban symbols to political revolutions examining manifold reasons for which social movements necessitate the affirmation or destruction of various material icons and public monuments What explains variability of life cycles of certain classes of symbols Why do some of them seem more potent than others Why do people exhibit nostalgic attachments to some symbols of the controversial past and vehemently oppose others What nourishes and threatens the social life of icons Through comparative analyses of major iconic processes following the epochal revolution of 1989 in Berlin and Warsaw the book argues that revolutionary action needs objects and sites which concretize the transformative redrawing of the symbolic boundaries between the sacred and profane good and evil before and after and progressive and reactionary the symbolic shifts that every revolution implies in theory and formalizes in practice Public symbols ensconced within actual urban spaces provide indispensable visibility to human values and social changes As affective topographies that externalize collective feelings their very presence and durability is meaningful and so are the revolutionary rituals of preservation and destruction directed at those spaces Far from being mere gestures or token signifiers they have their own gravity with profound cultural ramifications This volume will appeal to sociologists anthropologists geographers and social theorists with interests in urban studies public heritage material culture political revolution and social movements **Modernity with a Cold War Face**

Written in Red Gina Herrmann, 2010 The first major study of the profound impact of international communist politics and culture on Spanish letters Remembering Transitions Ksenia Robbe, 2023-10-04 This volume offers critical perspectives on memories of political and socioeconomic transitions that took place between the 1970s and 1990s across the globe and that inaugurated the end of the Cold War The essays respond to a wealth of recent works of literature film theatre and other media in different languages that rethink the transformations of those decades in light of present day crises The authors scrutinize the enduring silences produced by established frameworks of memory and time and explore the mnemonic

practices that challenge these frameworks by positing radical ambivalence or by articulating new perspectives and subjectivities As a whole the volume contributes to current debates and theory making in critical memory studies by reflecting on how the changing recollection of transitions constitutes a response to the crisis of memory and time regimes and how remembering these times as crises renders visible continuities between this past and the present It is a valuable resource for academics students practitioners and general readers interested in exploring the dynamics of memory in post authoritarian societies
