Research In Urban Educational Settings Lessons Learned And Implications For Future Practice:

Research in Urban Educational Settings Kimberly A. Scott, Wanda J. Blanchett, 2011 Results from quantitative and qualitative research studies have painted countless images of the unique features shaping urban schools including students experiences and how the surrounding communities affect the entire system Race ethnicity social class language power politics and public image operate as intersecting elements shaping the contours of urban school life therefore its documentation Little has been written about how researchers of urban schools and their constituencies effectively navigate these complex elements design a culturally sensitive and responsive project and acquire meaningful data What are some of the critically important issues a researcher should consider when working with urban schools What should be a researcher s commitment to the urban communities in which they conduct research How can a researcher develop a trusting relationship in an environment justifiably distrustful of outsiders These and other inquiries shape the contours of this edited volume As educators and policymakers take a closer examination at urban schools and their successes research of these unique settings assumes a more prominent role For academics both novice and experienced establishing and maintaining rapport within these environments often require greater attention than qualitative or quantitative research books accord Authors in this compilation share lessons learned about power privilege and their meanings as they pertain to conducting research in and with urban settings To this end four primary objectives guide this manuscript 1 To expand the conversation of urban school research to include multiple voices of culturally responsible caring scholars with a professed commitment to using research as an empowering tool for urban educational contexts 2 To provide practical accounts of what has and has not worked for individuals conducting both short term and longitudinal research in urban educational institutions and communities 3 To demonstrate the disconnect between classroom discussions of urban education and real life field experiences of researchers working in urban settings and 4 To broaden discussions of reflexivity by analyzing the complex journey qualitative and quantitative sociologists anthropologists teacher educators urban educators and special educators experience while negotiating and creating collaborative relationships with urban educators administrators students parents and community members

Bartee,Phillis

George,2019-05-01 The currency of social capital serves as an important function given the capacity to generate external access getting to and internal accountability getting through for individuals and institutions alike Pierre Bourdieu 1986 defines social capital as the aggregate of the actual or potential resources which are linked to possession of a durable

network of more or less institutionalized relationships of mutual acquaintance and recognition or in other words to membership in a group p 251 Social capital contains embedded resources as a tool for manifesting opportunities and options among individuals and groups Inevitably the aforementioned opportunities and options become reflective of the depth and breadth of access and accountability experienced by the individual and institution As educational stakeholders we must consistently challenge ourselves with the question How do K 12 schools and colleges and universities accomplish shared egalitarian goals of achieving access and accountability Such goals become fundamental toward ensuring students matriculating through K 12 and higher education irrespective of background are provided the caliber of education and schooling experience to prepare them for economic mobility and social stability To that end the volume *Contemporary Perspectives on Social Capital in Educational Contexts* 2019 as part of the book series *Contemporary Perspectives on Capital in Educational Contexts* offers a unique opportunity to explore social capital as a currency conduit for creating external access and internal accountability for K 12 and higher education The commonalities of social capital emerging within the 12 chapters of the volume include the following 1 Social Capital as Human Connectedness 2 Social Capital as Strategic Advocacy 3 Social Capital as Intentional Engagement and 4 Social Capital as Culturally Responsive Leadership Thus it becomes important for institutions of education i e secondary postsecondary continuing and individuals to assume efforts with intentionality and deliberateness to promote access and accountability *Qualitative Research* Stephen D. Lapan, MaryLynn T. Quartaroli, Frances J. Riemer, 2011-11-09 The authors noted scholars and researchers provide an up to date guide to qualitative study design data collection analysis and reporting Step by step the authors explain a range of methodologies and methods for conducting qualitative research focusing on how they are applied when conducting an actual study The book includes methods of data collection specific approaches to qualitative research and current issues in the field Specifically chapters cover the methods designs and analyses related to the methodologies of history case study program evaluation ethnography autoethnography narrative life histories emancipatory discourses feminist perspectives African American inquiry indigenous studies and practitioner qualitative research *Decolonizing Equity* Billie Allan, Rhonda Hackett, 2022-05-15T00:00:00Z Institutions everywhere seem to be increasingly aware of their roles in settler colonialism and anti Black racism As such many racialized workers find themselves tasked with developing equity plans for their departments associations or faculties This collection acknowledges this work as both survival and burden for Black Indigenous and racialized peoples It highlights what we already know and are already doing in our respective areas and offers a vision of what equity can look like through a decolonial lens What helps us to make this work possible How do we take care with ourselves and each other in this work What does solidarity collaboration or allyship look like in decolonial equity work What are the implicit and explicit barriers we face in shifting equity discourse policy and practice and what strategies skills and practices can help us in creating environments and lived realities of decolonial equity This edited collection centres the

voices of Indigenous Black and other racialized peoples in articulating a vision for decolonial equity work Specifically the focus on decolonizing equity is an invitation to re articulate what equity work can look like when we refuse to separate ideas of equity from the historical and contemporary realities of colonialism in the settler colonial nation states known as Canada and the United States and when we insist on linking an equity agenda to the work of decolonizing our shared realities
