Resisting Global Toxics David Naguib Pellow, 2007-08-10 Examines the export of hazardous wastes to poor communities of color around the world and charts the global social movements that challenge them Every year nations and corporations in the global North produce millions of tons of toxic waste Too often this hazardous material inked to high rates of illness and death and widespread ecosystem damage is exported to poor communities of color around the world In **Resisting Global Toxics** David Naguib Pellow examines this practice and charts the emergence of transnational environmental justice movements to challenge and reverse it Pellow argues that waste dumping across national boundaries from rich to poor communities is a form of transnational environmental inequality that reflects North South divisions in a globalized world and that it must be theorized in the context of race class nation and environment Building on environmental justice studies environmental sociology social movement theory and race theory and drawing on his own research interviews and participant observations Pellow investigates the phenomenon of global environmental inequality and considers the work of activists organizations and networks resisting it He traces the transnational waste trade from its beginnings in the 1980s to the present day examining global garbage dumping the toxic pesticides that are the legacy of the Green Revolution in agriculture and today s scourge of dumping and remanufacturing high tech and electronics products The rise of the transnational environmental movements described in **Resisting Global Toxics** charts a pragmatic path toward environmental justice human rights and sustainability

Science and Environment in Chile Javiera Barandiaran, 2018-07-31 The politics

of scientific advice across four environmental conflicts in Chile when the state acted as a neutral broker rather than protecting the common good In *Science and Environment in Chile* Javiera Barandiar n examines the consequences for environmental governance when the state lacks the capacity to produce an authoritative body of knowledge Focusing on the experience of Chile after it transitioned from dictatorship to democracy she examines a series of environmental conflicts in which the state tried to act as a neutral broker rather than the protector of the common good She argues that this shift in the role of the state occurring in other countries as well is driven in part by the political ideology of neoliberalism which favors market mechanisms and private initiatives over the actions of state agencies Chile has not invested in environmental science labs state agencies with in house capacities or an ancillary network of trusted scientific advisers despite the growing complexity of environmental problems and increasing popular demand for more active environmental stewardship Unlike a high modernist empire state with the scientific and technical capacity to undertake large scale projects Chile s model has been that of an umpire state that purchases scientific advice from markets After describing the evolution of Chilean regulatory and scientific institutions during the transition Barandiar n describes four environmental crises that shook citizens trust in government the near collapse of the farmed salmon industry when an epidemic killed millions of fish pollution from a paper and pulp mill that killed off or forced out thousands of black neck swans a gold mine that threatened three glaciers and five controversial mega dams in Patagonia

Toxic Sexual Politics Melina Packer,2025-01-28 *Toxic Sexual Politics* uses historical and contemporary evidence to show how the U S science of toxicology is a tool designed by and for the chemical industry suggesting that public health will never win the industry s game What if instead the science of toxicants explicitly confronted chemical corporate power building from queer feminist anti ableist and anti racist movements for environmental and reproductive justice

Cities and Global Governance Dr Mark Amen,Dr Noah J Toly,Professor Klaus Segbers,Professor Patricia L McCarney,2013-03-28 Case study rich this volume advances our understanding of the significance of the city in global governance The editors call for innovation in international relations theory with case studies that add breadth to theorizing the role sub national political actors play in global affairs Each of the eight case studies demonstrates different intersections between the local and the global and how these intersections alter the conditions resulting from globalization processes The case studies do so by focusing on one of three sub themes the diverse ways in which cities and sub national regions impact nation state foreign policy the various dimensions of urban imbrications in global environmental politics or the multiple methods and standards used to measure the global roles of cities

Toxic Injustice Susanna Rankin Bohme,2015 The pesticide dibromochloropropane known as DBCP was developed by the chemical companies Dow and Shell in the 1950s to target wormlike soil dwelling creatures called nematodes Despite signs that the chemical was dangerous it was widely used in U S agriculture and on Chiquita and Dole banana plantations in Central America In the late 1970s DBCP was linked to male sterility but an uneven regulatory process left many workers especially on Dole s banana farms exposed

for years after health risks were known Susanna Rankin Bohme tells an intriguing multilayered history that spans fifty years highlighting the transnational reach of corporations and social justice movements Toxic Injustice links health inequalities and worker struggles as it charts how people excluded from workplace and legal protections have found ways to challenge power structures and seek justice from states and transnational corporations alike Cities and Global Governance Mark Amen, Noah J. Toly, Patricia L. McCarney, Klaus Segbers, 2016-05-23 Case study rich this volume advances our understanding of the significance of the city in global governance The editors call for innovation in international relations theory with case studies that add breadth to theorizing the role sub national political actors play in global affairs Each of the eight case studies demonstrates different intersections between the local and the global and how these intersections alter the conditions resulting from globalization processes The case studies do so by focusing on one of three sub themes the diverse ways in which cities and sub national regions impact nation state foreign policy the various dimensions of urban imbrications in global environmental politics or the multiple methods and standards used to measure the global roles of cities

Recycling Reconsidered Samantha Macbride, 2013-08-16 How the success and popularity of recycling has diverted attention from the steep environmental costs of manufacturing the goods we consume and discard Recycling is widely celebrated as an environmental success story The accomplishments of the recycling movement can be seen in municipal practice a thriving private recycling industry and widespread public support and participation In the United States more people recycle than vote But as Samantha MacBride points out in this book the goals of recycling saving the earth and trees conserving resources and greening the economy are still far from being realized The vast majority of solid wastes are still burned or buried MacBride argues that since the emergence of the recycling movement in 1970 manufacturers of products that end up in waste have successfully prevented the implementation of more onerous yet far more effective forms of sustainable waste policy Recycling as we know it today generates the illusion of progress while allowing industry to maintain the status quo and place responsibility on consumers and local government MacBride offers a series of case studies in recycling that pose provocative questions about whether the current ways we deal with waste are really the best ways to bring about real sustainability and environmental justice She does not aim to debunk or discourage recycling but to help us think beyond recycling as it is today

Chemicals Without Harm Ken Geiser, 2015-05-29 Thousands of synthetic chemicals are used to make our clothing cosmetics household products and electronic devices However many of these chemicals are hazardous and potentially dangerous to our health and the environment For fifty years the conventional approach to hazardous chemicals has focused on regulation barriers and control Today there is a growing international interest in going beyond a singular focus on toxic and hazardous chemicals and developing broader policies for managing all chemicals This book proposes a new strategy for chemical management based on changing chemical production and consumption systems Beyond Straw Men Phaedra C. Pezzullo, 2023-08-22 Addressing plastics can feel overwhelming

Guilt shame anger hurt fear dismissiveness and despair abound Beyond Straw Men moves beyond hot take or straw man fallacies by illustrating how affective counterpublics mobilized around plastics reveal broader stories about environmental justice and social change Inspired by on and offline organizing in the Global South and the Global South of the North Phaedra C Pezzullo engages public controversies and policies through analysis of hashtag activism campaign materials and podcast interviews with headline making advocates in Bangladesh Kenya the United States and Vietnam She argues that plastics have become an articulator of crisis and an entry point into the contested environmental politics of carbon heavy masculinity carceral policies planetary fatalism eco ableism greenwashing marine life endangerment pollution colonialism and waste imperialism Attuned to plastic attachments Beyond Straw Men illustrates how everyday people resist unsustainable patterns of the plastics industrial complex through imperfect but impactful networked cultures of care
