Response Living Non Living Jagadish Chandra:

Response in the Living and Non-living Jagadish Bose, 2009 JAGADISH CHANDRA BOSE was born on November 30 1858 Mymensingh Bengal India now in Bangladesh and died on November 23 1937 Giridih Bihar His work as both a physiologist and physicist led to the invention of highly sensitive instruments for the detection of minute responses by living organisms to external stimuli This enabled him to measure the similarities in response between animal and plant tissues noted by many later researchers Bose's experiments on the quasi optical properties of very short radio waves led him to make improvements on the coherer an early form of radio detector which contributed to the development of solid state physics After earning a degree from the University of Cambridge 1884 Bose served as professor of physical science 1885 1915 at Presidency College Calcutta In 1917 he founded the Bose Institute in Calcutta which still exists today www.jcbose.ac.in To facilitate his research he constructed automatic recorders capable of registering extremely slight movements these instruments produced some striking results such as his demonstration of the sense of feeling in plants Bose also found that non living matter exhibits the same types of response to stimuli as do both animal and plant matter This demonstration that everything exists in the field of consciousness was one of his most important discoveries Bose was one of the first scientists in the world to undertake interdisciplinary research by looking at plants from the vantage point of physics He subjected plant and animal tissues to various kinds of stimulus and found that they all showed an electric response Finding that this reaction occurred in metals as well as plants and animals he then proceeded to study the differences in response under various conditions He found that all materials are numbed by cold intoxicated by alcohol wearied by excessive work stupefied by anesthetics excited by electric currents stung by physical blows and killed by poison They all exhibit essentially the same reactions of fatigue and depression together with the capacity for recovery and strength and also permanent unresponsiveness or death All materials are responsive or unresponsive under the same conditions and in the same manner His investigations showed that in the entire range of responses regardless of whether the subject is metallic plant or animal there are no exceptions The living response in all its diverse modifications is a repetition of the responses seen in the inorganic Further the nature of the response is determined not by the play of an unknowable and arbitrary vital force but by laws that do not change and act equally and uniformly throughout both organic and inorganic matter This realization was always at the core of his work He sought to show that all materials react to their environments according to the same laws in other words everything exists in the same field of consciousness Om Namah Shivaya This book was originally published in 1902 Jagadish Chandra Bose Science in Silence Owlture, A pioneer in radio waves and plant physiology Bose bridged science and philosophy He invented early wireless communication tools and believed in blending eastern thought with experimentation **The Hidden Life in Freemasonry** C. W. Leadbeater, 2007-06-01 If you are satisfied with regular business meetings and great fish fries then this is NOT the Masonic book for you This classic Masonic esoteric work is designed for the student seeking far deeper meanings

in Masonry In the words of the author Although the book is primarily intended for the instruction of members of the Co Masonic Order whose desire as is expressed in their ritual is to pour the waters of esoteric knowledge into the Masonic vessels I hope nevertheless that it may appeal to a wider circle and may perhaps be of use to some of those many Brn in the masculine Craft who are seeking for a deeper interpretation of Masonic symbolism than is given in the majority of their Lodges C W Leadbeater 1854 1934 was an English clergyman and respected theosophical author Leadbeater is the author of the popular Freemasonry and Its Ancient Mystic Rites This is an indispensable work for the esoteric Mason Foreword by Annie Besant Science, Spirituality and the Modernization of India Makarand R. Paranjape, 2009-04-01 Spirituality played a key role in the construction of Indian modernity While science has certainly been an agent of modernization in India and other non Western countries what makes Indian modernity somewhat special is that spiritual leaders have also been instrumental in the process Moreover leading Indian scientists and spiritualists have recognized the immense potential for dialogue between the two disciplines Post colonial India with its ready access to a holistic spirituality and significant achievements in science and technology is a fertile site for such a dialogue Each of the book s four sections addresses specific themes 1 The tension not just between science and spirituality but also between the East and West 2 how some key figures in India became carriers of modern consciousness and explored the relationship between science and spirituality in the very process of trying to reform their society 3 significant areas of research in which science and spirituality are both deeply implicated and 4 the relationship of both scientific and spiritual practice with gender and social justice The Problem of Increasing Human Energy Nikola Tesla, 2019-02-27 NIKOLA TESLA was a gifted electrical and mechanical engineer and was one of the most influential inventors of the last century Eventually holding over 700 patents Tesla worked in a number of fields including electricity robotics radar and the wireless transmission of energy His discoveries laid the groundwork for many of the twentieth century s greatest technological advances This book contains Tesla s thoughts on humanity s relationship with the universe and also his explanation and scientific extrapolation on the technological advancements embodied in his work This text first published in Century Illustrated Magazine in June 1900 is yet another example of the genius of Nikola Tesla CONTENTS Introduction The onward movement of humanity The energy of the movement The three ways of increasing human energy 1 The first problem how to increase human mass The burning of atmospheric nitrogen 2 The second problem how to reduce the force retarding the human mass The art of telautomatics 3 The third problem how to increase the force accelerating the human mass The harnessing of the Sun s energy 4 The source of human energy The three ways of drawing energy from the Sun 5 Great possibilities offered by iron for increasing human performance Enormous waste in iron manufacture 6 Economical production of iron by a new process 7 The coming of age of aluminium The doom of the copper industry The great civilizing potency of the new metal 8 Efforts toward obtaining more energy from coal Electric transmission The gas engine The cold coal battery 9 Energy from the medium The windmill and the
