Resources in Education, 1997 *Setting Priorities in Science* United States. Congress. House. Committee on Science, Space, and Technology. Subcommittee on Science, 1992 Species Diversity of Animals in Japan Masaharu Motokawa, Hiroshi Kajihara, 2016-11-26 This book summarizes the status quo of the knowledge about the biodiversity in terrestrial freshwater and marine animals that live in Japan Consisting of some 6 800 islands that are arrayed for approximately 3 500 km from north to south the Japanese archipelago has a complex history in a paleogeographic formation process over time and harbors rich flora and fauna This work will contribute to establishing a general biogeographic theory in archipelagoes around continental shelves Facing the ongoing extinction crisis one of the most important tasks for our generation is to bequeath this precious natural heritage to future generations As the first step toward this goal a species list has been compiled through solid steady alpha taxonomic work in each taxon Furthermore the phylogeography and population genetic structure for each species is elucidated for deeper understanding of the local fauna the scientific results of which should be the basis for establishing conservation policies and strategies Also the problem of alien or introduced species is

investigated as another threat to the native fauna Each of the 27 chapters is written by the most active specialist leading the field thus readers can acquire up to date knowledge of the animal species diversity and their formation process of Japanese animals in the most comprehensive form available This book is recommended for researchers and students who are interested in species diversity biogeography and phylogeography **Singapore Biodiversity** Peter K.
