Modern Construction Economics Theory And Application:

Modern Construction Economics Gerard de Valence, 2010-11-10 Modern construction economics has a wider focus than was previously the case with stronger links to mainstream economics reflecting increasing interest in a range of theoretical issues This book brings together the essential reviews of this trend and pushes towards the development of a comprehensive theoretical framework for construction economics

Modern Construction Economics Gerard de Valence, 2010-11-10 Traditional building economics has primarily been concerned with issues around project appraisal and cost management techniques On the other hand modern construction economics has a wider focus with stronger links to mainstream economics reflecting an increased interest in a range of theoretical issues in construction economics both at the macro and micro level In *Modern Construction Economics Theory and Application* a variety of approaches are used to present a coherent vision of synthesis between industry economics and project economics Topics covered include developing construction economics as industry economics competition and barriers to entry in construction innovation in construction theory testing in construction management research collusion and corruption in the construction sector Including contributions from academics in the UK Sweden Hong Kong and Australia this is a truly global review of a core issue for the construction industry worldwide The result is a unique book that will push toward the development of a comprehensive theoretical framework of construction economics This is a must read for all serious students of construction economics and all practitioners looking for a deeper understanding of their industry

Construction Economics Danny Myers, 2016-09-22 *Construction Economics* provides students with the principles underlying the relationship between economic theory and the construction industry Its new approach specifically examines the problems of securing sustainable construction The new edition has been fully revised to provide an overview of the economy and construction markets since the global financial crisis As such it examines the challenges of changing government policy adapting to climate change adopting BIM and reducing costs A new introduction along with new readings data examples glossary items government strategies and references revises this established core text and brings it up to the historic EU referendum As with previous editions it retains a tried and tested format a clear and user friendly style use of a second colour for emphasis regular summaries of key points a glossary of construction economics extensive use of tables and figures extracts from *Construction Management and Economics* reviews of useful websites This invaluable textbook is essential reading across a wide range of disciplines from construction management and civil engineering to architecture property and surveying

Research Companion to Construction Economics Ofori, George, 2022-03-15 This innovative *Research Companion* considers the history nature and status of construction economics and its need for development as a field in order to be recognised as a distinct discipline It presents a state of the art review of construction economics identifying areas for further research

Describing Construction Rick Best, Jim Meikle, 2022-09-16 This third book from editors Rick Best and Jim Meikle brings together and

presents insights into a number of key concepts in the study of construction firms projects and the group of activities that loosely define the construction industry The value for readers comes from the collection of a variety of topics in a single volume which provide a basic understanding of the complexities of construction as more than a set of practical concerns such as labour management and materials handling Instead the focus is on analysis of the industry and its component parts from the viewpoints of construction economists and others seeking to understand the drivers and challenges that shape an area of economic activity that is a major contributor in all economies The aim of this book is to provide an overview and discussion of several aspects of what makes construction tick It is unlike other industry sectors in many ways being project based with often intense competition for work Where the first book Measuring Construction focused on particular areas associated with quantifying various aspects of construction activity and the second Accounting for Construction looked more at how we record and report on construction activity Describing Construction gives readers the views of experts in the field of how the construction industry is described what it's made up of it even asks the question is construction a single industry This book will change the way most readers understand the construction industry whatever that may be not from the point of view of visible on site activities but through a scientific approach to analysis and understanding of how projects firms and various sectors of the industry work and how things are changing and may continue to change in future It is essential reading for students and researchers in construction management quantity surveying architecture and engineering

Building Cost Planning for the Design Team Jim Smith, D M Jaggar, Peter Love, 2016-02-26 Cost management of all building projects has become increasingly important as clients in the public and private sector demand the highest quality cost planning services with accurate budgeting and cost control All members of the design team must integrate their activities to ensure that a high quality project is delivered on time and within budget This book considers building cost planning and cost control from the client and the design team's perspective where all decisions whether concerned with design cost quality time value or sustainability are taken as being interrelated The latest Royal Institute of British Architects RIBA Plan of Work and the New Rules of Measurement for Early Stage Estimating and Cost Planning issued by the Royal Institution of Chartered Surveyors RICS have been incorporated into this new text The book follows the building design cost planning process from the crucial inception stages and then through all the design stages to the completion of the technical design contract documentation and the tender It provides a template for good cost planning practice An essential addition to this third edition is the introduction of integrated design and documentation processes captured in building Information modelling BIM on line cost databases and computerised methods of cost planning The integrated approaches are explained and provide vital information and knowledge for practitioners involved in building projects All stakeholders involved in development and design and client teams in public and private sector policy making and implementation need to understand the new approaches to design management processes and how cost planning and design approaches are adapting to using the new technology in practice

The interactive style using in text and review questions makes this ideal for students and practitioners alike in property architecture construction economics construction management real estate engineering facilities management and project management
