Mathematical and Statistical Methods in Food Science and Technology Daniel Granato, Gastón Ares, 2014-03-03 Mathematical and Statistical Approaches in Food Science and Technology offers an accessible guide to applying statistical and mathematical technologies in the food science field whilst also addressing the theoretical foundations Using clear examples and case studies by way of practical illustration the book is more than just a theoretical guide for non statisticians and may therefore be used by scientists students and food industry professionals at different levels and with varying degrees of statistical skill

Predictive Microbiology in Foods Fernando Perez-Rodriguez, Antonio Valero, 2012-12-12 Predictive microbiology is a recent area within food microbiology which studies the responses of microorganisms in foods to environmental factors e g temperature pH through mathematical functions These functions enable scientists to predict the behavior of pathogens and spoilage microorganisms under different combinations of factors The main goal of predictive models in food science is to assure both food safety and food quality Predictive models in foods have developed significantly in the last 20 years due to the emergence of powerful computational resources and sophisticated statistical packages This book presents the concepts models most significant advances and future trends in predictive microbiology It will discuss the history and basic concepts of predictive microbiology The most frequently used models will be explained and the most significant software and databases e g Combase Sym Previews will be reviewed Quantitative Risk Assessment which uses predictive modeling to account for the transmission of foodborne pathogens across the food chain will also be covered

Omics, Microbial Modeling and Technologies for Foodborne Pathogens Xianghe Yan, 2012 Provides comprehensive information on genetic analysis and multiple omics methods microbial modeling and other technologies used for the analysis of foodborne pathogens This title details the use of genomics and other omics technologies to study and classify foodborne bacteria viruses fungi and protozoa

Handbook of Natural Antimicrobials for Food Safety and Quality M Taylor, 2014-11-04 Natural additives are increasingly favoured over synthetic ones as methods of ensuring food safety and long shelf life The antimicrobial properties of both plant based antimicrobials such as essential oils and proteins such as bacteriocins are used in for example edible preservative films in food packaging and in combination with synthetic preservatives for maximum efficacy New developments in delivery technology such as nanoencapsulation also increase the potential of natural antimicrobials for widespread use in industry Part one introduces the different types of natural antimicrobials for food applications Part two covers methods of application and part three looks at determining the effectiveness of natural antimicrobials in food Part four focuses on enhancing quality

and safety and includes chapters on specific food products Reviews different types of antimicrobials used in food safety and quality Covers how antimicrobials are created to be used in different foods Examines how the antimicrobials are used in foods to enhance the safety and quality *Encyclopedia of Agricultural, Food, and Biological Engineering* Dennis R. Heldman, Carmen I. Moraru, 2010-10-21 Examining the role of engineering in delivery of quality consumer products this expansive resource covers the development and design of procedures equipment and systems utilized in the production and conversion of raw materials into food and nonfood consumer goods With nearly 2000 photographs figures tables and equations including 128 color figures the book emphasizes and illustrates the various engineering processes associated with the production of materials with agricultural origin With contributions from more than 350 experts and featuring more than 200 entries and 3600 references this is the largest and most comprehensive guide on raw production technology
