Haddad, David Rifkind, 2016-12-05 1960 following as it did the last CIAM meeting signalled a turning point for the Modern Movement From then on architecture was influenced by seminal texts by Aldo Rossi and Robert Venturi and gave rise to the first revisionary movement following Modernism Bringing together leading experts in the field this book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010 It consists of two parts the first section providing a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects Interior Design Since 1900 Anne Massey, 2008 From the Arts and Crafts movement to the present day including discussions of Art Nouveau Bauhaus the Modern Movement and Art Deco through to Hi Tech and green design every style of interior since 1900 is charted in this concise wide ranging critical survey Interior design in the twentieth century saw many changes in direction all documented here with the emergence of professional interior decoration and its evolution into interior design Interiors domestic and other are explored and placed within their social political economic and cultural context This new and expanded edition is brought up to date with a chapter on sustainable design focusing on public spaces such as hotels offices factories and shops **BOOK JACKET**

Building the New World Valerie Fraser, 2000 Brasilia Caracas Mexico City Rio de Janeiro these are cities synonymous with some of the most innovative and progressive architecture of the twentieth century The period between 1930 and 1960 in particular when many Latin American economies expanded rapidly was an era of incomparable inventiveness and creative production as the various governments strove to shake off their colonial pasts and make public their modernising intentions This book focuses on major state funded architectural projects featuring not only the high profile prestigious building like the House of Representatives in Brasilia but also social architecture such as schools and low cost housing developments Architects like Oscar Niemeyer and Lúcio Costa who undertook this work with considerable autonomy and significant financial resources in effect became social planners their avant garde aesthetic and technical experimentation often being teamed with radical social agendas By 1960 the year in which Brasilia was inaugurated economic growth in the region was slowing and faith in the modernist project in general was faltering The English speaking world which had previously endorsed and even envied Latin American architectural production changed its opinion and largely dismissed it from the history of twentieth century architecture Building the New World redresses the balance It provides an accessible introduction to the most important examples of state funded modernism in Latin America during a period of almost unimaginable optimism when politicians and architects saw architecture as literally a way of building themselves out of underdevelopment and into the new world of a culturally rich and socially inclusive future

Contemporary Architecture Marta Tobolczyk, 2021-07-05 This book offers an exciting journey into the most recent architectural achievements seen in their complexity and plurality and described in the most objective and truthful way The development of contemporary architecture is presented as it commenced more than a century ago as it tried to reconcile democratic ideals with the forces of the Industrial Era In contrast to many books on the modern day art of building the

development of architecture is not described chronologically here but rather independently for each selective architectural trend This allows a better explanation of some evolutionary processes and the continuity of each trend Thanks to such an approach this book will serve as a convenient tutorial for courses on history of contemporary architecture in all art and architectural schools

Inflection 06: Originals Sir Peter Cook, Alison Brooks, Beatriz Colomina, Sean Godsell, Adam Peacock, 2019-09-16 Architects are expected to create original ideas resulting in a unique bespoke design With the rise of Modern Architecture originality became ingrained in perceptions of good design As a result originality has become a barometer against which we measure the value of design However technology today allows for ease of replication and copies thus originality in design has become an ostensibly hollow prospect Originals gathers a wide range of responses varied in their opinions and approaches to originality and authorship in design and architecture Inflection is a student run design journal based at the Melbourne School of Design University of Melbourne Born from a desire to stimulate debate and generate ideas it advocates the discursive voice of students academics and practitioners Founded in 2013 Inflection is a home for provocative writing a place to share ideas and engage with contemporary discourse
