

Handpiece Maintenance

Clean and Dry

External Cleaning: The exterior of each handpiece should be scrubbed with a mild detergent and water, and then dried with a paper towel.

Internal Cleaning: Hold handpiece in a paper towel and apply Bio Lube® Advanced Handpiece Cleaner (2-3 second burst) into the air drive port. For first time cleaning, flush handpiece thoroughly. Old oil and protein buildup will dissolve leaving no residue.

Lubricate with Bio Lube®

Lubricate handpiece with a short 1 second burst of Bio Lube® Advanced Dental Handpiece Lubricant. The spray nozzle from other manufacturers' lubricants will attach to the Bio Lube® spout or can (inset photo).

Extends Life!
Reduces Wear!
Runs Smoother!

Run Handpiece

It is vital to complete the cleaning and lubrication process by purging each handpiece. Insert bur and run the handpiece up to speed into a paper towel for 30 seconds. Running the handpiece sets the Bio Lube® TLC polymer, eliminates excess oil, and prevents sluggish handpiece performance after sterilization.

Clean Slow Speed Motors & Accessories

Clean and lubricate motors, straight nosepieces, and contra angles with Bio Lube® products. After lubricating, run each handpiece for 20-30 seconds. You will notice a smoother-running, quieter handpiece. Always remember to lubricate with Bio Lube® Dental Handpiece Lubricant before running.

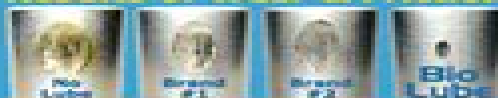

Sterilize and Remove Promptly

After cleaning and lubricating, wipe excess lubricant from the exterior of the handpiece. Bag and sterilize the handpiece according to the handpiece manufacturer's recommendations.

Note: When using Bio Lube® Dental Handpiece Cleaner and Lubricant, there is no need to lubricate handpieces after sterilization.

Results of Wear & Friction
